#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

# **Management Discussion of Fund Performance**

November 13, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended September 30, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

## Results of Operations

#### **Investment Performance**

The performance of the Fund's Series A securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series A securities returned 3.6% (after deducting fees and expenses paid by the series). This compares with the S&P/TSX Composite Index return of 6.2%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Despite heightened trade uncertainty and rising interest rates, the Canadian equity market posted a gain over the period in response to improved economic growth and strong corporate earnings. Higher oil prices led to more favourable investor sentiment toward the energy sector. The Bank of Canada increased its policy rate in July. This helped bolster bank stocks, which also benefited from improved profit margins. The health care sector experienced significant growth as valuations of cannabis-related stocks surged.

Within the S&P/TSX Composite Index, health care, industrials and information technology were the strongest sectors, while materials, consumer discretionary and utilities were the weakest.

The Fund underperformed the index primarily because of stock selection in the energy sector and lack of exposure to the health care sector. Stock selection in the industrials sector also detracted from performance, while stock selection in utilities and underweight exposure to materials contributed.

Over the period, portfolio activity and market effect resulted in increased exposure to Canada. At the sector level, exposure to financials and energy increased, while exposure to materials decreased.

#### **Net Assets**

The Fund's NAV declined by 4.7% to \$819.1 million at September 30, 2018, from \$859.3 million at March 31, 2018. This change was composed primarily of \$39.0 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, and \$79.2 million in net redemptions.

See Other Related Party Transactions for the percentage of the Fund's NAV owned by related parties. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions. At September 30, 2018, Mackenzie had received no such notices.

### Fees and Expenses

The annualized management expense ratio ("MER") for Series A of 2.48% during the period ended September 30, 2018, was unchanged from the MER for the year ended March 31, 2018. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report. The MERs for Series F, Series PW and Series PWFB decreased due to a decrease in the management and/or administration fee rates effective June 1, 2018, as noted in the *Fund Formation and Series Information* section of the report. The MER for Series PW also decreased due to a decrease in fund costs.

## Recent Developments

The portfolio management team believes the Canadian equity market is becoming increasingly attractive given relatively low valuations. Despite the recent rise in interest rates and expectations of further monetary tightening, the team believes that equity market valuation levels remain compelling. In the team's opinion, continued synchronized global economic growth is likely to support underlying earnings growth and therefore stock prices. Although the economic cycle is in its later stages, the team does not anticipate a material economic slowdown in the medium term.

Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

#### Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

#### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. Operating expenses attributable to B-Series are charged directly to that particular series. See also *Management Fees*.

## **Other Related Party Transactions**

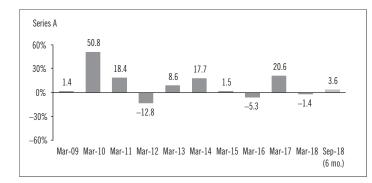

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series S securities are also offered on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. At September 30, 2018, funds managed by Mackenzie owned 22.7% of the Fund's NAV, and the Related Insurance Companies owned 45.2% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

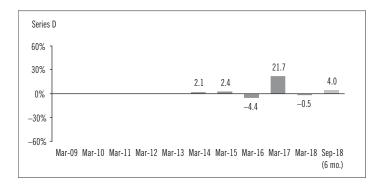

At September 30, 2018, Mackenzie had an investment of \$36,897 in the Fund (less than 0.1% of the Fund's NAV).

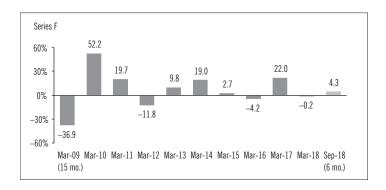

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

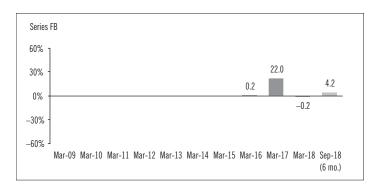

### **Past Performance**

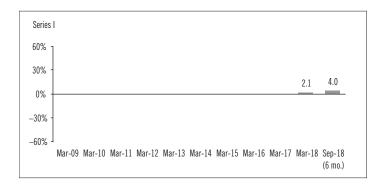

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the Notes to Financial Statements.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

**CANADIAN EQUITY FUND** 

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 31% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

B-Series securities are no longer available for sale.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
