Changes to the Investment Strategies of Mackenzie FuturePath Canadian Sustainable Equity Fund

5. On page 74, under the sub-heading “**Investment Strategies**”, by deleting all paragraphs and replacing the with the following:

The investment portfolio of the Fund will generally include equity securities that are selected from constituents of the MSCI Canada IMI Extended ESG Focus Index (the “**Index**”). The Index is designed to maximize exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics like those of the underlying market capitalization weighted index – MSCI Canada Index, which aims to represent 85% of the tradable equity securities in the Canadian stock market. The index is constructed by selecting constituents of the market capitalization weighted index through an optimization process that aims to maximize exposure to ESG factors for a target tracking error budget under certain constraints. The Index uses information such as company ESG ratings, MSCI Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics. MSCI ESG Ratings aim to measure entities’ management of environmental, social and governance risks and opportunities. MSCI ESG Ratings are based on a seven-point scale from ‘AAA’ to ‘CCC’, indicating how an entity manages relevant key issues relative to industry peers. MSCI Controversies provide assessments of

controversies concerning the potential negative environmental, social, and/or governance impact of company operations, products and services. MSCI Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions reliably and efficiently. MSCI Climate Change Metrics provide climate data on topics such as transition risks, green opportunities, physical risks and 1.5° alignment. Companies involved in Tobacco, Controversial Weapons, and Civilian Firearms and Oil are not eligible for inclusion in the Index.

From the Index, the portfolio manager applies a quantitative approach to stock selection and portfolio construction to determine the portfolio weights that they believe provide the strongest opportunity for long-term outperformance against the Index.

The Fund also optimizes ESG risks in the portfolio construction process to minimize non-financial risks in pursuit of excess return over the Index. Environmental criteria consider how a company addresses issues such as pollution control and waste management. Social criteria examine how it manages relationships with employees, suppliers, customers, and the communities where it operates. Governance deals with a company's leadership, executive pay, audits, internal controls, and shareholder rights.

The Fund is a Sustainable Investment Solution that is considered a sustainable core fund, as further described in the **"Sustainable Investing at Mackenzie"** section of this simplified prospectus.

Generally, the Fund will not invest more than 10% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the **"Fund of Funds"** disclosure under **"Fees and Expenses"**.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the **"What are the General Risks of Investing in a Mutual Fund? – What Does the Fund Invest In?"** section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

Purchasers' Statutory Rights

Securities legislation in some provinces and territories gives securityholders the right to withdraw from an agreement to buy securities of a mutual fund within two business days of receiving the simplified prospectus or Fund Facts, or to cancel a purchase within forty-eight hours of receiving confirmation of an order.

Securities legislation in some provinces and territories also allows securityholders to cancel an agreement to buy securities of a mutual fund or to get their money back, or to make a claim for damages, if the simplified prospectus, Fund Facts or financial statements misrepresent any facts about the fund. These rights must usually be exercised within certain time limits.

For more information, securityholders should refer to the securities legislation of their provinces or territory or consult a lawyer.
