MACKENZIE FIXED INCOME STRATEGIES

Integrate Diverse Mandates
Into Your Portfolio

Mackenzie's Fixed Income Strategies

Covering a wide array of mandates

The Mackenzie Fixed Income team builds portfolios by incorporating bonds from across the risk/return spectrum – using “core” and “plus” components – to strike the desired balance between credit and interest rate risk and deliver a specific combination of investor objectives.

Different fixed income assets have different effects on a portfolio. If your objective is:

Capital Preservation

Bonds with higher credit quality and lower interest rate sensitivity (duration), such as federal and provincial government bonds, tend to exhibit low volatility and protect capital.

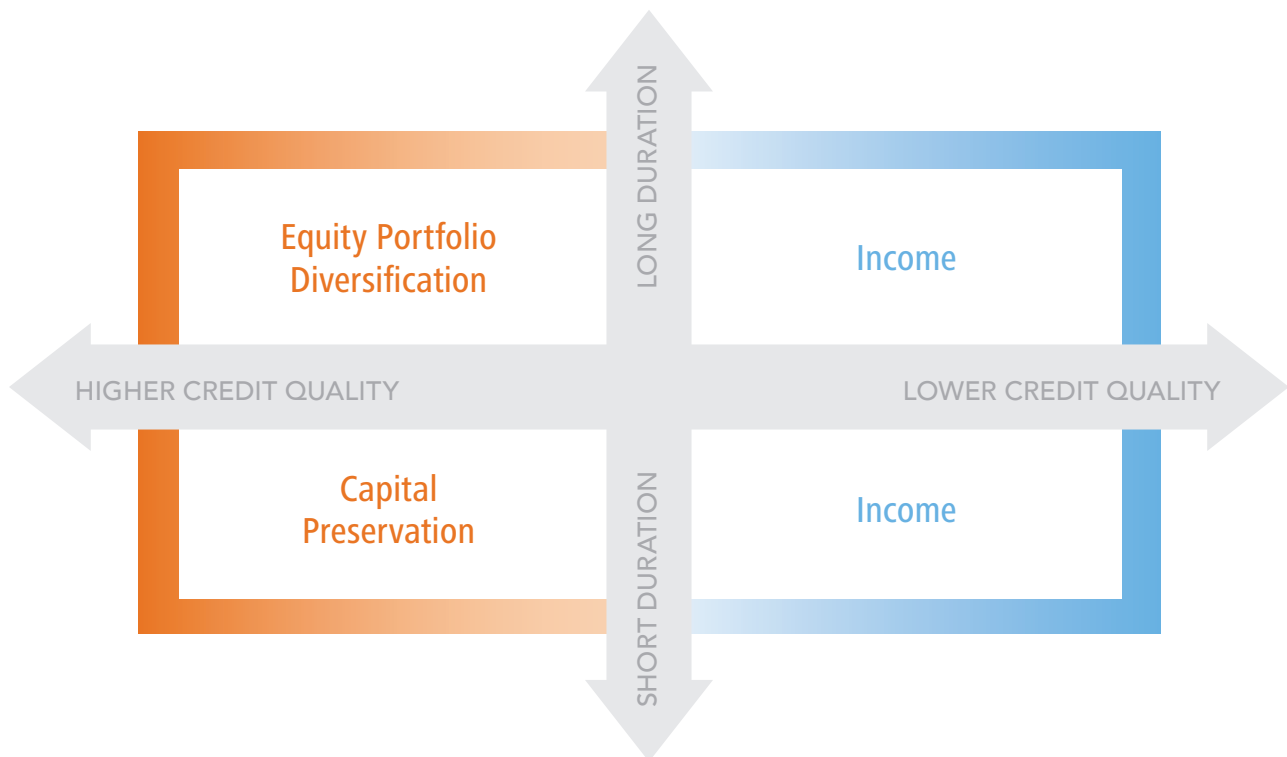

Equity Portfolio Diversification

High credit quality bonds with more interest rate sensitivity (duration), such as government or investment grade bonds, tend to be the least correlated with equities and can provide the greatest portfolio diversification.

Income

Lower credit quality bonds across the maturity spectrum, such as floating rate loans and high yield bonds, tend to offer additional yield to compensate investors for the higher credit risk, contributing greater income to the portfolio.

Actively Managed Building Blocks

We offer a diverse array of strategies for all your fixed income needs – whether the goal is to preserve capital, reduce overall portfolio volatility or enhance income and total return potential.

Morningstar Star Ratings reflect performance of Series F as of December 31, 2018 and are subject to change monthly. The ratings are an objective, quantitative measure of a fund's historical risk-adjusted performance relative to other funds in its category. Only funds with at least a three-year track record are considered. The overall star rating for a fund is a weighted combination calculated from a fund's 3, 5, and 10-year returns, as available, measured against the 91-day treasury bill and peer group returns. A fund can only be rated if there are a sufficient number of funds in its peer group to allow comparison for at least three years. If a fund scores in the top 10% of its fund category, it gets 5 stars; if it falls in the next 22.5%, it receives 4 stars; a place in the middle 35% earns a fund 3 stars; those in the next 22.5% receive 2 stars; and the lowest 10% receive 1 star. For more details on the calculation of Morningstar Star Ratings, see www.morningstar.ca.

The CIFSC categories, Star Ratings, number of funds in each category, and annual compounded performance for the standard periods are: Mackenzie Canadian Bond Fund Series F, Canadian Fixed Income category: 3 years – 4 stars (407 funds) 1.06%, 5 years – 4 stars (333 funds) 2.41%, 10 years – 4 stars (152 funds) 3.08%.
