Mackenzie fixed income capabilities

A wide range of expertise.
A world of opportunity.
Fixed income

An essential part of your portfolio

Fixed income is an important component of a well-diversified investment portfolio. Traditionally, investors have incorporated fixed income assets into their portfolios to generate a steady income stream, preserve capital and/or increase diversification.

However, the current market environment is presenting a number of challenges to fixed income investors – from low yields, to uncertainty around policy rates, to increased credit risk – making it difficult to meet their financial goals.

Mackenzie’s fixed income philosophy

Capitalize on a world of expertise

At Mackenzie, our team of experienced professionals is dedicated to building a wide range of fixed income solutions that address the needs of today’s investors. Our philosophy centers around three tenets:

Global opportunity set

We believe in expanding the opportunity set of investments beyond the typical universe defined by our benchmarks, accessing a broad array of fixed income securities and currencies globally.

Comprehensive and integrated research

We believe that investments in complex markets should be underpinned by a comprehensive research effort that integrates macroeconomic, fundamental credit and quantitative analysis.

Truly active management

We believe that being truly active managers within our fixed income strategies, and rigorous in our risk management, allows us to build effective fixed income portfolios that deliver the risk and return characteristics our investors desire.

“Our active and flexible approach to investing helps us uncover opportunities across fixed income markets and enables us to build portfolios with the risk and return characteristics to deliver on investors’ objectives.”

Steve Locke
MBA, CFA
Senior Vice President, Portfolio Manager
Head of the Fixed Income Team

In this environment, you need a partner who understands your challenges and offers the right solutions.
**Depth and breadth of expertise**

**Rigorous research**

Mackenzie Fixed Income Team combines qualitative macroeconomic assessment, fundamental credit analysis and quantitative research to ensure that the limitations of each type of analysis are balanced by the strengths of the others.

**Macroeconomic research**

Our macroeconomic research effort seeks to understand key market drivers, geopolitical risks and the way in which they will affect the debt of countries and companies.

**Dustin Reid, MBA**

Vice President, Chief Fixed Income Strategist

**Quantitative research**

Quantitative tools and models can process vast amounts of data, enabling objective relative comparisons. Further, quantitative models can help identify emerging or changing trends, and signal opportunities for investing or risk hedging.

**3 dedicated quantitative analysts:**

Jeff Li, Senior Analyst, Quantitative Analytics
Ramsey D'Silva, Quantitative Analyst
Mikhail Fadeev, Quantitative Analyst

**Fundamental credit research**

Our team of in-house credit analysts conduct rigorous research and modelling on every company we invest in. We seek to understand their business models, their balance sheets, and the risks to their creditworthiness. Analyst coverage is divided by sector. Within their sectors, our analysts are responsible for companies across the credit spectrum and capital structure. We believe this offers significant opportunity to identify relative value between companies and individual securities.

**7 dedicated credit analysts:**

Jon Ennis, AVP, Senior Analyst
Ken Yip, Associate Portfolio Manager
Colin Du, Senior Investment Analyst

Winnie Lee, Settlements Analyst
Henno Einola, Investment Analyst
Jan Iyengar, Investment Analyst
Erica Roa, Investment Analyst
**Active portfolio management**

Our team of portfolio managers have diverse backgrounds and experience across fixed income asset classes and markets, and each specialize in a segment of those markets.

**Trading expertise**

Our dedicated traders offer continuous input into the investment process and portfolio allocation decisions through market-level analysis of liquidity, flows and technical trends, with the objective of bringing best execution and trading efficiency.

**$45.7B in retail and institutional fixed income assets under management.**

Morningstar Star Ratings reflect performance of Series F as of February 29, 2020 and are subject to change monthly. The ratings are an objective, quantitative measure of a fund’s historical risk-adjusted performance relative to other funds in its category. Only funds with at least a three-year track record are considered. The overall star rating for a fund is a weighted combination calculated from a fund’s 3, 5, and 10-year returns, as available, measured against the 91-day treasury bill and peer group returns. A fund can only be rated if there are a sufficient number of funds in its peer group to allow comparison for at least three years. If a fund scores in the top 10% of its fund category, it gets 5 stars; if it falls in the next 22.5%, it receives 4 stars; a place in the middle 35% earns a fund 3 stars; those in the next 22.5% receive 2 stars; and the lowest 10% receive 1 star. For more details on the calculation of Morningstar Star Ratings, see www.morningstar.ca.
