Investing in companies with strong fundamental and sustainability characteristics

At Mackenzie Betterworld we incorporate proprietary ESG analysis with fundamental analysis to identify growth opportunities and to mitigate risk.

We do not rely on ESG ratings or scores from third parties. We conduct proprietary research using our proven process to uncover and evaluate opportunities that meet our ESG standards and financial criteria metrics.

This process combines negative and positive screening with the goal of avoiding unsustainable or controversial businesses, while favouring companies that contribute to the United Nations Sustainable Development Goals (SDGs).

Active ownership helps build deeper relationships

We believe that a company has a responsibility to all its stakeholders, not just its shareholders. In our view, companies that can successfully balance the interests of stakeholders can better manage risks, capture opportunities and ultimately, better align to a sustainable future.

Active ownership is an important part of our process. As stewards of capital, we have a responsibility to engage with companies to maintain a dialogue on managing material ESG risks and delivering positive impact to their stakeholders.
