Why Invest in this pool?

- Global exposure to equity markets, including the U.S., international and emerging markets. This comprehensive approach seeks to capture the benefits of diversification and the potential for growth at a time when global equities could be entering a period of extended outperformance.
- Exposure to U.S. equities that aims to generate returns comparable to the market over a business cycle, while helping to minimize the impact of market corrections.
- Tax efficiency options for building wealth through a corporate class version, and for generating a monthly cash flow with an annual 5% fixed rate distribution paid monthly.

* The MSCI World Index is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets. It consists of 24 developed market country indices.

** The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio. Please see mackenzieinvestments.com/currency to view funds/products using currency derivatives to hedge exchange rate risk.
