Why Invest in this pool?

- Maintains a weighted average credit quality of "A-" or higher, which allows access to global opportunities to generate potentially higher total returns while maintaining low risk classifications.
- Makes global investment decisions based on each country's point in the credit cycle, creating opportunities for superior returns.
- Access to the global fixed income universe of 25,000 securities to make relative value assessments across credit qualities, interest-rate environments, durations, structures, sectors, currencies and countries.

Risk Tolerance

LOW	MEDIUM	HIGH
------------	--------	------

* The BofA Merrill Lynch Global Broad Market (Hedged to CAD) Index tracks the performance of investment grade debt publicly issued in the major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged back to the Canadian dollar.

** The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio. Please see mackenzieinvestments.com/currency to view funds/products using currency derivatives to hedge exchange rate risk.

*** Credit allocation details are provided by one or more sources that may include DBRS, S&P, Bloomberg, FTSE TMX and Citigroup Corp.
