

# Mackenzie FuturePath Monthly Income Balanced Portfolio

## Why invest in this fund?

- Risk mitigation to help protect against volatile markets.
- Consistent cashflow to help meet life's spending needs.
- Growth potential to help the investment last.
- For investors who seek predictable cash flow and some long-term growth with less downside.
- Consistent monthly cashflow of 5% (annualized) to help meet life's spending needs.\*

## What does this fund invest in?

- The Fund seeks a balance of income with long-term capital growth, while seeking to reduce volatility by investing primarily in Canadian and foreign fixed-income securities and equities and other asset categories, either directly or through other mutual funds. It may also use derivatives.
- The Fund's asset mix will generally range between 40%–60% equities and 25%–60% fixed-income securities.
- The Fund will also allocate a small portion of its portfolio to cash and/or commodities.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

\*On an annual basis, distributions will be composed of income, dividends, capital gains and return of capital. The payment of distributions is not guaranteed and may fluctuate. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, you will have to pay capital gains tax on the amount below zero.
