Why Invest in this fund?

- Overcome sector rotation limitations
- Control the portfolio's sensitivity to the business cycle
- Effectively shift core equity to tilt towards risk-off or risk-on stance

Risk Tolerance

LOW

MEDIUM

HIGH

* The MSCI USA IMI Select Cyclical Sectors Index is designed to capture the large, mid, and small-cap segments of the U.S. equity market. The index is designed to reflect the performance of securities from select GICS® sectors. The index includes securities classified in Information Technology, Financials, Consumer Discretionary, Industrials, Communication Services, Energy and Materials sectors. Sector weights in the index are adjusted to match the corresponding sector weights in the MSCI USA IMI Index. If a sector is not represented in the index, its weight from the MSCI USA IMI Index is proportionally redistributed among the included sectors.

Commissions, management fees, brokerage fees and expenses may all be associated with Exchange Traded Funds. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions, and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any security holder that would have reduced returns. Exchange Traded Funds are not guaranteed, their values change frequently, and past performance may not be repeated.
