### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.*

*The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.*

## Management Discussion of Fund Performance

July 13, 2020

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the year ended March 31, 2020 (the "period"), that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

### Investment Objective and Strategies

The Fund seeks long-term capital growth by investing primarily in U.S. equities. The Fund uses a growth style of investing.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for medium- to long-term investors looking for a U.S. equity fund to hold as part of their portfolio, who can handle the volatility of stock markets and who have a low to medium tolerance for risk. Before June 28, 2019, the Fund was deemed suitable for investors who had a medium tolerance for risk. The Fund is not recommended for registered plans.

### Results of Operations

#### Investment Performance

The performance of the Fund's Series A securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series A securities returned -1.8% (after deducting fees and expenses paid by the series). This compares with the S&P 500 Index return of -1.9%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

U.S. equity markets rallied strongly into February despite weakening economic data, particularly within the manufacturing sector. Declining interest rates and the "phase one" trade deal reached between the United States and China provided hope for a recovery in gross domestic product growth. However, U.S. equities fell sharply in March in response to the worldwide health measures put into place to mitigate the impact of the COVID-19 pandemic. A weaker Canadian dollar late in the period boosted returns for Canadian investors.

Within the S&P 500 Index, information technology, consumer staples and health care were the strongest sectors in Canadian dollar terms, while energy, industrials and financials were the weakest.

The Fund performed in line with the index, with stock selection in the financials and industrials sectors, as well as underweight exposure to the energy sector, contributing to performance. Conversely, stock selection in the information technology and health care sectors detracted from performance.

The Fund's exposure to the U.S. dollar was partially hedged, which detracted from performance as the U.S. dollar appreciated relative to the Canadian dollar.

Over the period, the Fund's cash position increased as a result of portfolio activity and market effect. At the sector level, exposure to information technology increased, while exposure to health care decreased. Changes to the portfolio included new positions in Microsoft Corp., The Progressive Corp. and Automatic Data Processing Inc., and the elimination of the positions in Stryker Corp., Zoetis Inc. and Heineken NV.

### Net Assets

The Fund's NAV declined by 7.1% to \$534.5 million at March 31, 2020, from \$575.3 million at March 31, 2019. This change was composed primarily of \$8.1 million in net losses (after including dividend and interest income) from investment performance, after deducting fees and expenses, \$30.9 million in net redemptions (which includes an inflow of \$23.7 million relating to fund merger activity), and \$1.8 million in cash distributions.

### Fees and Expenses

The management expense ratio ("MER") for Series A of 2.52% during the year ended March 31, 2020, was unchanged from the MER for the year ended March 31, 2019. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report.

### Recent Developments

Governments worldwide have enacted emergency measures to combat the spread of the COVID-19 virus in the last several months. These measures have caused significant volatility and weakness in global equity markets and material disruption to businesses globally, resulting in an economic slowdown. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions.

The duration and impact of the COVID-19 pandemic on businesses and markets, and the extent of economic relief measures provided by governments and central banks, are unknown at the reporting date and it is therefore not possible to reliably estimate the impact on the financial results and position of the Fund in future periods.

The portfolio management team believes that the massive fiscal and monetary stimuli put in place by governments worldwide to curb the impact of the COVID-19 pandemic are important steps, but that the key to managing the crisis is rapid and forceful containment. Although the team

# MACKENZIE US GROWTH CLASS

US EQUITY FUND

expects economic activity to rebound ultimately, a quick return to pre-crisis levels seems increasingly unlikely. In the team's opinion, businesses involved in travel, tourism and large gatherings face an uncertain and difficult path to recovery, while consumer staples, health care products, certain information technology and data analytics companies, and even grocers and telecommunication services may be less affected. The team has repositioned the portfolio accordingly to deal with the rapid change in economic environment.

Following the approval of investors in the Fund, investors in Mackenzie Cundill US Class and the securities regulators, Mackenzie Cundill US Class merged into the Fund on February 7, 2020. Mackenzie does not consider this merger to be a material change from the Fund's perspective.

## Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

## Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

## Other Related Party Transactions

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series S securities are also offered on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. The Related Insurance Companies were amalgamated into one company, The Canada Life Assurance Company, effective January 1, 2020. At March 31, 2020, funds managed by Mackenzie owned 1.9% of the Fund's NAV, and The Canada Life Assurance Company owned 0.7% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

At March 31, 2020, Mackenzie had an investment of \$0.5 million in the Fund (0.1% of the Fund's NAV).

Mackenzie relied on a recommendation issued by the Independent Review Committee to proceed with the merger of Mackenzie Cundill US Class into the Fund in February 2020.

## Past Performance

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

On July 26, 2013, the Fund changed its mandate from investing mainly in North American equities to investing primarily in equity securities of U.S. companies. The past performance before this date was achieved under the previous objectives.

## Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

## Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2020. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

- These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 40% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

Series R securities are offered only to other affiliated funds and certain institutional investors in connection with fund-of-fund arrangements.

Series S securities are offered to The Canada Life Assurance Company and certain other mutual funds, but may be sold to other investors as determined by Mackenzie.

Series DZ and Series J securities were created specifically for the purpose of implementing mergers affecting the Fund and are not available for sale.

Series G securities are no longer available for sale, except for additional purchases by investors who have held these securities since December 11, 2017.

Series I securities are no longer available for sale.

Series PWF securities are no longer available for sale. Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
