

Annual Management Report of Fund Performance

For the Year Ended March 31, 2020

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR website at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus, Annual Information Form and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

Management Discussion of Fund Performance

July 13, 2020

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the year ended March 31, 2020 (the "period"), that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Investment Objective and Strategies

The Fund seeks long-term capital growth by investing primarily in equities of energy and natural resource companies located anywhere in the world. It generally invests in both small- and large-capitalization companies.

Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for long-term investors looking for a global resource sector equity fund to hold as part of their portfolio, who can handle the volatility of stock and commodity markets, and who have a high tolerance for risk. The Fund is not recommended for registered plans.

Results of Operations

Investment Performance

The performance of the Fund's Series A securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series A securities returned -38.4% (after deducting fees and expenses paid by the series). This compares with a return of -5.5% for the Fund's broad-based index, the MSCI World (Net) Index, and a return of -31.3% for a blended index composed of a 55% weighting in the MSCI World Energy (Net) Index (returned -43.3%) and a 45% weighting in the MSCI World Materials (Net) Index (returned -14.4%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Global equity markets rallied strongly into February despite weakening economic data, particularly within the manufacturing sector. Declining interest rates and the "phase one" trade deal reached between the United States and China provided hope for a recovery in global gross domestic

product growth. However, global equities fell sharply in March in response to the worldwide health measures put into place to mitigate the impact of the COVID-19 pandemic. A weaker Canadian dollar late in the period boosted returns for Canadian investors.

Within the MSCI World (Net) Index, Denmark, Switzerland and New Zealand were the strongest-performing countries in Canadian dollar terms, while Austria, Norway and Belgium were the weakest. From a sector perspective, information technology, health care and utilities were the strongest performers, while energy, financials and materials were the weakest.

Global economic prospects deteriorated rapidly in the final quarter of the period as COVID-19 spread swiftly worldwide. Oil prices collapsed after Russia and the Organization of the Petroleum Exporting Countries failed to agree to lower output in the face of significantly lower demand. Base metal prices also fell substantially as industrial production and construction slowed dramatically due to the pandemic. Gold, on the other hand, rallied because it was seen as a haven against currency devaluation and rising debt.

The Fund underperformed the broad-based index, with overweight exposure to the energy sector detracting from performance. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund underperformed the blended index. Within the oil, gas and consumable fuels industry, an overweight position in oil and gas exploration and production stocks detracted from performance. At a country level, security selection in Canada detracted from performance.

Conversely, within the metals and mining industry, overweight exposure to gold contributed to performance relative to the blended index. At a country level, overweight exposure to Canada contributed to performance, partially offsetting the negative impact of security selection.

The Fund's exposure to the U.S. dollar was partially hedged, which had no significant impact on performance.

During the period, the Fund held call options on gold futures and gold exchange-traded funds, which contributed to performance.

Over the period, the portfolio management team decreased the Fund's exposure to the United States based on a deteriorating outlook for the country's energy sector. As a result, the Fund's cash position increased. Changes to the portfolio included a new position in Yamana Gold Inc. and the elimination of the position in MRC Global Inc.

Net Assets

The Fund's NAV declined by 51.8% to \$14.7 million at March 31, 2020, from \$30.5 million at March 31, 2019. This change was composed primarily of \$9.4 million in net losses (after including dividend and interest income) from investment performance, after deducting fees and expenses, and \$6.4 million in net redemptions.

MACKENZIE GLOBAL RESOURCE CLASS

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2020

SECTOR FUND

Fees and Expenses

The management expense ratio (“MER”) for Series A of 2.54% during the year ended March 31, 2020, was slightly lower than the MER of 2.55% for the year ended March 31, 2019. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report.

Recent Developments

Governments worldwide have enacted emergency measures to combat the spread of the COVID-19 virus in the last several months. These measures have caused significant volatility and weakness in global equity markets and material disruption to businesses globally, resulting in an economic slowdown. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions.

The duration and impact of the COVID-19 pandemic on businesses and markets, and the extent of economic relief measures provided by governments and central banks, are unknown at the reporting date and it is therefore not possible to reliably estimate the impact on the financial results and position of the Fund in future periods.

The portfolio management team believes the trajectory of COVID-19 and the implementation of new fiscal policies will determine the pace at which both supply and demand return to more typical levels. Certain industries, such as oil production, have failed to limit output despite a collapse in demand, which the team believes could slow the price recovery since high inventories will have to be gradually decreased when demand recovers.

In the team’s view, gold prices should reflect the unprecedented monetary policies that are supporting fiscal deficits. As such, the team believes gold could offer portfolio diversification for investors who have reached their maximum allocation to equities and are reluctant to hold low-yielding bonds. The Fund is positioned to reflect the team’s favourable outlook for gold and muted outlook for oil prices.

Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds’ Independent Review Committee with respect to a related party transaction because it did not engage in any related party transactions.

Past Performance

The Fund’s past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2020. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return ¹ :	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception ²
Series A	-38.4	-16.7	-8.2	-4.7	n/a

MSCI World Materials (Net) Index	-14.4	-1.2	2.0	3.8	Note 6

* Broad-based index

The blended index is composed of 55% MSCI World Energy (Net) Index and 45% MSCI World Materials (Net) Index.

The MSCI World (Net) Index represents large- and mid-cap equity performance across 23 developed markets. Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

The MSCI World Energy (Net) Index represents large- and mid-cap equity performance across 23 developed markets. All securities in the index are classified in the energy sector as per the Global Industry Classification Standard ("GICS"). Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

The MSCI World Materials (Net) Index represents large- and mid-cap equity performance across 23 developed markets. All securities in the index are classified in the materials sector as per the Global Industry Classification Standard ("GICS"). Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

- (1) The percentage return differs for each series because the management fee rate and expenses differ for each series.
- (2) The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.
- (3) The return of the Blended Index since inception for each applicable series is as follows: Series D -2.1%, Series FB -3.0%, Series PW -2.1%, Series PWFB -9.1%, Series PWX -3.3%.
- (4) The return of the MSCI World (Net) Index since inception for each applicable series is as follows: Series D 8.7%, Series FB 5.5%, Series PW 8.6%, Series PWFB 3.8%, Series PWX 8.3%.
- (5) The return of the MSCI World Energy (Net) Index since inception for each applicable series is as follows: Series D -7.2%, Series FB -8.8%, Series PW -7.2%, Series PWFB -15.4%, Series PWX -9.3%.
- (6) The return of the MSCI World Materials (Net) Index since inception for each applicable series is as follows: Series D 4.0%, Series FB 3.9%, Series PW 3.9%, Series PWFB -1.4%, Series PWX 4.0%.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 42% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

SECTOR FUND

Fund Formation and Series Information

The Fund may have undergone a number of changes, such as a reorganization or a change in manager, mandate or name. A history of the major changes affecting the Fund in the last 10 years can be found in the Fund's Annual Information Form.

Date of Formation October 26, 2000

The Fund may issue an unlimited number of securities of each series. The number of issued and outstanding securities of each series is disclosed in *Financial Highlights*.

Series Offered by Mackenzie Financial Corporation (180 Queen Street West, Toronto, Ontario, M5V 3K1; 1-800-387-0614; www.mackenzieinvestments.com)

Series A securities are offered to retail investors investing a minimum of \$500.

Series D securities are offered to retail investors investing a minimum of \$500 through a discount brokerage or other account approved by Mackenzie.

Series F securities are offered to investors who are enrolled in a dealer-sponsored fee-for-service or wrap program, who are subject to an asset-based fee rather than commissions on each transaction and who invest at least \$500; they are also available to employees of Mackenzie and its subsidiaries, and directors of Mackenzie.

Series FB securities are offered to retail investors investing a minimum of \$500. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor.

Series O securities are offered only to investors investing a minimum of \$500,000 who are enrolled in Mackenzie Portfolio Architecture Service or Open Architecture Service; certain institutional investors; investors in a qualified group plan, and certain qualifying employees of Mackenzie and its subsidiaries.

Series PW securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000.

Series PWFB securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor.

Series PWX securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor.

Series R securities are offered only to other affiliated funds and certain institutional investors in connection with fund-of-fund arrangements.

Series I and Series U securities are no longer available for sale.

Series PWF securities are no longer available for sale. Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
