### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

# Management Discussion of Fund Performance

### June 4, 2025

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2025 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read A Note on Forward-Looking Statements on the first page of this document.

## Investment Objective and Strategies

The Fund seeks income and some long-term capital growth by investing primarily in one or more mutual funds that invest in Canadian and foreign fixed income securities and other asset categories, although it may also invest in securities directly. The Fund diversifies in terms of geographic exposure, sector exposure, portfolio manager style, credit quality and duration.

## Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for short- to medium-term investors looking for a managed asset portfolio fund to hold as part of their portfolio, who can handle the volatility of bond markets and who have a low tolerance for risk.

# **Results of Operations**

### **Investment Performance**

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series A securities returned 6.0%, and Series LB securities returned 5.9% (after deducting fees and expenses paid by the series). This compares with a return of 7.2% for a blended index composed of a 90% weighting in the Fund's broad-based index, the FTSE Canada Universe Bond Index (returned 7.7%), and a 10% weighting in the ICE BofA Global Broad Market (Hedged) Index (returned 2.9%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

In response to cooling inflation and weaker labour markets, many central banks lowered interest rates during the period. The U.S. Federal Reserve reduced its federal funds rate three times to a target range of 4.25%–4.50%. The European Central Bank reduced its key interest rate to 2.65%, while the Bank of England cut its policy rate to 4.50%. Meanwhile, the Bank of Japan raised its policy rate to 0.50% from zero. In response to weak economic data, the Bank of Canada reduced its policy rate seven times to 2.75% from 5.00%. Economic uncertainty rose in the period amid heightened trade tensions and the likelihood that U.S. tariffs could slow economic activity and increase inflationary pressures in Canada.

The Fund underperformed the broad-based index, with holdings in alternative funds and global bonds detracting from performance. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund underperformed the blended index. The Fund's asset allocation detracted from performance, while the selection of underlying funds within each asset class contributed to performance.

Among the underlying funds in the portfolio, the largest detractors from relative performance were Mackenzie Enhanced Fixed Income Risk Premia Fund and Mackenzie Canadian Money Market Fund. Mackenzie Canadian Money Market Fund was eliminated from the portfolio in the period, while Mackenzie Enhanced Fixed Income Risk Premia Fund represented 3.8% of net assets at period-end. The largest contributors to relative performance were Mack Canadian Bond Pool, Mackenzie Sovereign Bond Fund and Mackenzie Broad Risk Premia Collection Fund (respectively representing 59.8%, 7.2% and 1.9%).

The Fund's overall foreign currency exposure is actively managed to help mitigate risk and take advantage of opportunities. During the period, these currency activities detracted from performance.

Changes to the portfolio also included a new allocation to Mackenzie Core Plus Canadian Fixed Income ETF, and the elimination of the allocation to iShares iBoxx \$ Investment Grade Corporate Bond ETF.

### **Net Assets**

The Fund's net assets decreased by 4.5% during the period to \$231.0 million. This change was composed primarily of \$14.7 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$25.7 million due to net securityholder activity (including sales, redemptions and cash distributions).

### **Fees and Expenses**

The management expense ratio ("MER") for each series during the year ended March 31, 2025, was generally similar to the MER for the year ended March 31, 2024. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

### **Recent Developments**

The portfolio management team expects the United States to maintain tariff pressure on Canada throughout 2025 and believes the Canadian dollar is likely to weaken further. With respect to fixed income investments, the team maintains a neutral outlook for duration (sensitivity to changes in interest rates). The team expects U.S. economic developments – including government job cuts, trade conflicts and general uncertainty – to weigh on growth. At period-end, markets were expecting the U.S. Federal Reserve to cut the federal funds rate three more times in 2025.

The following changes to the Mackenzie Funds' Independent Review Committee occurred:

- effective September 13, 2023, Saijal Patel was appointed;
- effective March 5, 2024, Atul Tiwari resigned; and
- effective April 30, 2024, the terms for Robert Hines and George Hucal expired, and Rebecca Cowdery was appointed

### **Related Party Transactions**

### Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Simplified Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

### **Other Related Party Transactions**

During the period, the Fund received \$0.1 million in income distributions from investments in exchange-traded funds ("ETFs") managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions in the period.

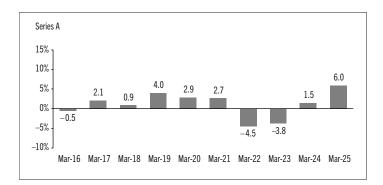

## Past Performance

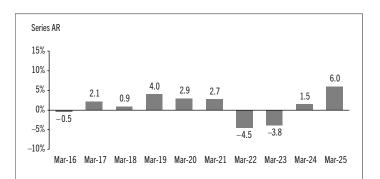

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

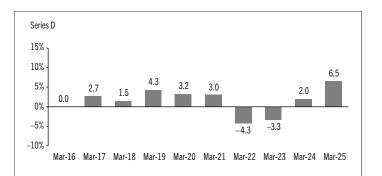

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

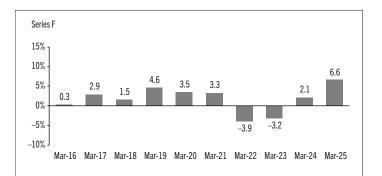

### Year-by-Year Returns

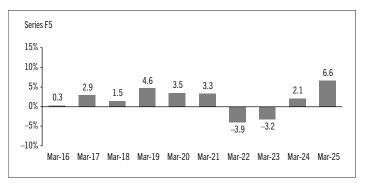

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

## Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2025. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

#### \* Broad-based index

The blended index is composed of 90% FTSE Canada Universe Bond Index and 10% ICE BofA Global Broad Market (Hedged) Index.

The FTSE Canada Universe Bond Index is a broad measure of Canadian bonds with terms to maturity of more than one year. It includes federal, provincial, municipal and corporate bonds rated "BBB" or higher.

The ICE BofA Global Broad Market (Hedged) Index tracks the performance of investment grade debt publicly issued in major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged to the Canadian dollar.

- The percentage return differs for each series because the management fee rate and expenses differ for each series.
- (2) The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.
- (3) The return of the blended index since inception for each applicable series is as follows: Series FB 2.0%, Series FR 5.1%, Series PWFB 1.8%, Series PWR 1.4%, Series PWT5 1.8%, Series LF 2.0%, Series LF 5.0%, Series LW 1.8%, Series LW5 1.8%.
- (4) The return of the FTSE Canada Universe Bond Index since inception for each applicable series is as follows: Series FB 2.0%, Series FR 5.3%, Series PWFB 1.9%, Series PWR 1.5%, Series PWT5 1.9%, Series LF 2.1%, Series LF5 2.1%, Series LW 1.9%, Series LW5 1.9%.
- (5) The return of the ICE BofA Global Broad Market (Hedged) Index since inception for each applicable series is as follows: Series FB 1.3%, Series FR 3.3%, Series PWFB 1.1%, Series PWR 0.5%, Series PWT5 1.1%, Series LF 1.0%, Series LF5 1.0%, Series LW 0.9%, Series LW5 0.9%.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

(1) This information is provided as at the end of the fiscal period shown.

- (2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2025

# **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to the Manager. Under this arrangement, LBC was entitled to approximately 25% of the total management fees that the Manager received from the LBC series of all Mackenzie funds during the period. The Manager is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

The following dealers affiliated with the Manager may be entitled to distributionrelated payments from the Manager on the same basis as unrelated registered brokers and dealers: Investors Group Securities Inc. and Investors Group Financial Services Inc.

The Manager used approximately 42% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 36% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions paid for that series.

Series LM securities are no longer available for sale, except that pre-authorized contribution plans that were in place as at November 25, 2015, may continue.

Effective June 1, 2022, an investor may purchase the Fund under a sales charge purchase option and a no-load purchase option. Not all purchase options are available under each series of the Fund. The sales charge under the sales charge purchase option is negotiated by the investor with their dealer. Securities purchased before June 1, 2022, under the redemption charge purchase option and low-load 3 purchase option (collectively the "deferred sales charge purchase options") may continue to be held in investor accounts. Investors may switch from securities of a Mackenzie fund previously purchased under these deferred sales charge purchase options to securities of other Mackenzie funds, under the same purchase option, until such time as the redemption schedule has expired.
