A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

Management Discussion of Fund Performance

July 13, 2020

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the year ended March 31, 2020 (the "period"), that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Investment Objective and Strategies

The Fund seeks income and long-term capital growth in U.S. dollars by investing primarily in fixed income securities issued by companies or governments of any size, anywhere in the world. The Fund allocates assets across credit quality, structures, sectors, currencies and countries.

Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for short- to medium-term investors seeking a U.S. dollar-denominated global fixed income fund to diversify a traditional portfolio of fixed income and equity investments, who can handle the volatility of bond markets and who have a low tolerance for risk.

The Fund is not available for purchase under registered plans, but taxable accounts may continue to purchase the Fund.

Results of Operations

Investment Performance

The performance of the Fund's Series SC securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series SC securities returned 3.5% (after deducting fees and expenses paid by the series). This compares with the ICE BofA Global Broad Market (Hedged) Index return of 6.9%. All index and series returns are calculated on a total return basis in U.S. dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Prices of global government bonds, particularly long-term bonds, rose as yields declined over the period. Investment grade corporate bond prices made smaller gains. Many global central banks reduced key interest rates, first in response to global trade tensions, then in response to the

COVID-19 crisis. In March, the U.S. Federal Reserve reduced the federal funds rate to near zero. Yields on 10-year and 30-year U.S. Treasury bonds and Government of Canada bonds fell to record lows. Yields in Europe and Japan, which were already negative, fell further.

High-yield bond prices declined as the pandemic sent global markets into turmoil. Oil prices fell after Russia and the Organization of the Petroleum Exporting Countries failed to agree to cut production. High-yield spreads (the difference in yield between government bonds and high-yield bonds of similar maturity) widened significantly.

The Fund underperformed the index, with its duration positioning within corporate bonds and holdings in term loans detracting from performance. At a regional level, the Fund's holdings in emerging market and Japanese bonds detracted from performance.

Conversely, duration positioning within government bonds and underweight exposure to corporate bonds contributed to performance. At the country level, the Fund's holdings in U.S. securities contributed to performance.

The Fund substantially hedged its foreign currency exposure back to the U.S. dollar. However, the remaining unhedged exposure detracted from performance as most currencies held in the Fund depreciated relative to the U.S. dollar.

The Fund held put options on a high-yield bond exchange-traded fund and a long-term government bond exchange-traded fund to help manage credit risk exposure, which contributed to performance. The Fund's futures positions, used to manage duration in specific markets, detracted from performance. Currency options, held tactically to gain exposure to currency markets, contributed to performance. The Fund also held swaps earlier in the period to gain exposure to or mitigate the risks of certain interest rate exposures, which had no significant impact on performance.

Over the period, the portfolio management team introduced new exposure to China, increased the Fund's exposure to the United States and Israel, and decreased its exposure to Canada and Australia, based on the relative valuations of these countries. The team also increased the Fund's exposure to foreign government bonds and decreased its exposure to corporate bonds and term loans, based on the relative valuations of these sectors.

Net Assets

The Fund's NAV increased by 143.7% to US\$15.2 million at March 31, 2020, from US\$6.2 million at March 31, 2019. This change was composed primarily of US\$0.4 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, and US\$8.6 million in net sales.

Fees and Expenses

The management expense ratio ("MER") for Series SC of 1.64% during the year ended March 31, 2020, was slightly lower than the MER of 1.67% for the year ended March 31, 2019. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report. The MERs for Series F and Series PWFB decreased due to a decrease in fund costs. The MER for Series F also decreased due to a decrease in the management fee rate effective June 1, 2018, as noted in the *Fund Formation and Series Information* section of the report.

Recent Developments

Governments worldwide have enacted emergency measures to combat the spread of the COVID-19 virus in the last several months. These measures have caused significant volatility and weakness in global equity markets and material disruption to businesses globally, resulting in an economic slowdown. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions.

The duration and impact of the COVID-19 pandemic on businesses and markets, and the extent of economic relief measures provided by governments and central banks, are unknown at the reporting date and it is therefore not possible to reliably estimate the impact on the financial results and position of the Fund in future periods.

Despite monetary and fiscal policies enacted globally in an attempt to mitigate the COVID-19 crisis, the portfolio management team believes markets may be dealing with the most severe economic disruption in decades. The team also believes risk assets will face more negative news before the pandemic is contained and the economy begins to stabilize. Economic data has not come close to reaching a bottom, in the team's view. As a result, the team believes some consumers and corporations could continue to face difficulty over credit card maintenance, servicing mortgages, car loans, lines of credit, accounts payable and general debt obligations. Amidst the global pandemic, the team continues to maintain a defensive tilt to our positioning while looking for opportunities to improve the overall credit quality of the Fund.

Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

At March 31, 2020, Mackenzie had an investment of US\$16,571 in the Fund (0.1% of the Fund's NAV).

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

Past Performance

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

The ICE BofA Global Broad Market Index (Hedged to USD) tracks the performance of investment grade debt publicly issued in major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged back to the U.S. dollar.

- (1) The percentage return differs for each series because the management fee rate and expenses differ for each series.
- (2) The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.
- (3) The return of the ICE BofA Global Broad Market Index (Hedged to USD) since inception for each applicable series is as follows: Series A 3.9%, Series D 3.9%, Series F 3.9%, Series F5 (formerly Series F6) 4.1%, Series FB 4.1%, Series FB5 4.1%, Series PW 3.9%, Series PWFB 4.7%, Series PWFB5 4.7%, Series PWT5 (formerly Series PWT6) 4.7%, Series PWX 4.2%, Series SC 3.9%.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 26% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

Series SC securities are offered to retail investors investing a minimum of \$500 under the sales charge purchase option.

Series F5, Series FB5, Series PWFB5, Series PWT5, Series S5 and Series T5 securities are no longer available for sale. Before January 1, 2019, Series F5, Series PWT5, Series S5 and Series T5 securities were known as Series F6, Series PWT6, Series S6 and Series T6, respectively.

Series PWF and Series PWF6 securities are no longer available for sale. Effective June 1, 2018, Series PWF and Series PWF6 securities were consolidated into Series F and Series F6 (now Series F5) securities, respectively.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
