## **Annual Management Report of Fund Performance**

*For the Year Ended March 31, 2022*

*This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR website at [www.sedar.com](http://www.sedar.com).*

*Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus, Annual Information Form and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.*

*For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.*

### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.*

*The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.*

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

## Management Discussion of Fund Performance

June 3, 2022

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2022 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

### Investment Objective and Strategies

The Fund seeks a high level of current income and the potential for long-term capital appreciation primarily through long and/or short positions in fixed income securities and equities of issuers anywhere in the world. The Fund's asset mix will generally range between 45%–65% fixed income securities and 35%–55% equities. The Fund may engage in physical short sales and borrowing and/or use derivatives for hedging and investment purposes.

The Fund's aggregate exposure to its sources of leverage is calculated as the sum of the following sources of leverage, and must not exceed 300% of its net asset value: (i) the aggregate market value of securities sold short; (ii) the value of indebtedness under any borrowing arrangements for investment purposes; and (iii) the aggregate notional value of the Fund's specified derivatives positions excluding any specified derivatives used for hedging purposes.

### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for medium- to long-term investors looking for an alternative income mutual fund to hold as part of their portfolio, who can handle the volatility of bond and stock markets, and who have a low to medium tolerance for risk.

### Results of Operations

#### Investment Performance

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series A securities returned 6.3% (after deducting fees and expenses paid by the series). This compares with a return of –4.1% for the Fund's broad-based index, the ICE BofA Global Broad Market (Hedged) Index, and a return of 2.3% for a blended index.\* All index and series returns are calculated

\* The blended index is composed of a 40% weighting in the ICE BofA Global Broad Market (Hedged) Index (returned –4.1%), a 25% weighting in the MSCI World High Dividend Yield (Net) Index (returned 8.8%), a 15% weighting in the ICE BofA Global High Yield (Hedged) Index (returned –3.4%), a 10% weighting in the MSCI World Infrastructure (Net) Index (returned 5.6%) and a 10% weighting in the FTSE EPRA Nareit Developed REITs Index (returned 18.5%).

on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Global equity markets generally rose but were volatile over the period. Russia's invasion of Ukraine disrupted energy markets, particularly in the eurozone. The period ended with a massive investor rotation out of growth stocks and into lower-priced value stocks. Bond yields across the Group of Ten ("G10") countries experienced volatility in response to emerging COVID-19 variants, rising prices and escalating geopolitical tensions. Emerging market bonds ended the period weaker as yields of U.S. fixed income assets surged in anticipation of tightening U.S. Federal Reserve policy.

Within the MSCI World High Dividend Yield (Net) Index, Canada, Denmark and Singapore were the strongest-performing markets in Canadian dollar terms, while Belgium, Finland and Ireland were the weakest. The energy, health care and utilities sectors were the strongest performers, while communication services, real estate and information technology were the weakest.

Within the MSCI World Infrastructure (Net) Index, Austria, Switzerland and the United States were the strongest-performing markets in Canadian dollar terms, while Japan, Italy and Norway were the weakest. The energy and health care sectors were the strongest performers, while communication services and industrials were the weakest.

Within the FTSE EPRA Nareit Developed REITs Index, the United States, Canada and the Netherlands were the strongest-performing markets in Canadian dollar terms, while Japan, New Zealand and Hong Kong were the weakest. Among sub-industries, industrial real estate investment trusts ("REITs"), residential REITs and specialized REITs were the strongest performers, while hotel and resort REITs, diversified REITs and office REITs were the weakest.

The Fund outperformed the broad-based index because of its allocation to equities, which outperformed fixed income over the period. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund outperformed the blended index, with an overweight allocation to equities and stock selection in the equity portfolio contributing to performance. The Fund's use of leverage also contributed to performance. Holdings in preferred shares detracted from performance.

Within the fixed income portion of the Fund, holdings in term loans and underweight exposure to government bonds contributed to performance.

Within the equity portion of the Fund, underweight exposure to Japan and overweight exposure to Canada contributed to performance. In sector terms, an underweight position and stock selection in communication services and overweight exposure to financials contributed to performance. Conversely, stock selection in the United States detracted from performance, as did underweight exposure to the health care sector.

Hedging of foreign currency exposure contributed to performance as a result of the overall depreciation of the hedged currencies relative to the Canadian dollar.

Over the period, the portfolio management team increased the Fund's exposure to equities and decreased exposure to fixed income and cash, in order to meet the Fund's target yield. Exposure to Canada increased. Within the equity portion of the Fund, exposure to the utilities, real estate and energy sectors increased. Within the fixed income portion of the Fund, exposure to corporate bonds and foreign government bonds decreased, while exposure to term loans and federal bonds increased. These geographic and sector changes were a result of the team's quantitative process, which seeks to maintain a well-balanced portfolio of yield-generative asset classes.

# MACKENZIE ALTERNATIVE ENHANCED YIELD FUND

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

## Leverage

Leverage occurs when the Fund borrows money or securities, or uses derivatives, to generate investment exposure that would otherwise not be possible. The Fund's aggregate exposure to its sources of leverage is calculated as the sum of the following: (i) the market value of short holdings; (ii) the amount of cash borrowed for investment purposes; and (iii) the notional value of the Fund's derivatives positions, excluding any derivatives used for hedging purposes. This exposure must not exceed 300% of the Fund's NAV.

The Fund uses conservative amounts of leverage strategically to help fund its yield target and monthly distribution. During the period, the Fund's aggregate exposure to sources of leverage ranged from 27% to 47% of the Fund's NAV. The low end of the range occurred in May 2021 as a result of a large inflow of assets. The high end of the range represents the typical amount of leverage in the Fund. The sources of leverage were cash borrowing, options and futures. Including the notional value of derivatives used for hedging, the low and high amounts of leverage ranged from 36% to 67%.

## Net Assets

The Fund's net assets increased by 146.7% during the period to \$36.1 million. This change was composed primarily of \$1.7 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$19.8 million due to net securityholder activity (including sales, redemptions and cash distributions).

## Fees and Expenses

The management expense ratio ("MER") for each series during the year ended March 31, 2022, generally varied from the MER for the year ended March 31, 2021. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for Series A and Series PWFB decreased due to changes in their average net assets. The MER for Series PW decreased due to a decrease in fund costs. The MERs for all series are presented in the *Financial Highlights* section of this report.

## Recent Developments

Ongoing uncertainty regarding the duration and long-term impact of the COVID-19 pandemic and the effectiveness of vaccines against new variants of the virus contributes to uncertainty regarding the timing of a full economic recovery. As a result, it is not possible to reliably estimate the impact of the pandemic on the financial results and condition of the Fund in future periods.

The portfolio management team makes strategic allocations to income-producing asset classes using a quantitative optimization process. This process uses current yield, expected future return, risk and correlations for each asset class as inputs. These are based on historical analysis and the team's expectations for these asset classes in the current environment. Despite having some tactical flexibility, the Fund will always seek to maintain exposure to numerous income-generating asset classes to produce regular income and will generally remain highly diversified.

The Fund is positioned to generate attractive monthly income for investors, with dividend-paying equities, high-yield bonds and term loans contributing most to the current yield of the Fund at period-end. In addition, the Fund makes use of real estate and infrastructure investments, preferred shares and investment grade bonds and uses leverage conservatively in the pursuit of high risk-adjusted, yield-oriented returns.

Effective September 22, 2021, Atul Tiwari was appointed to the Mackenzie Funds' Independent Review Committee.

## Related Party Transactions

### Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

### Other Related Party Transactions

The Manager is wholly owned by IGM Financial Inc., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Corp. of Canada are therefore considered affiliates of the Manager. At March 31, 2022, the Fund held the following investment(s) in companies affiliated with the Manager: \$0.6 million invested in securities issued by Power Corp. of Canada. The investment(s) represented 1.6% of the Fund's NAV. In making the investment(s), the Manager relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with the Manager's policies. The Manager's policies are designed to ensure that any related party transaction (i) is made free from any influence by an entity related to the Manager and without taking into account any considerations relevant to an entity related to the Manager; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; and (iii) achieves a fair and reasonable result for the Fund.

Investment funds managed by Mackenzie and its affiliates may invest in the Fund. All these investments are made on a prospectus-exempt basis in accordance with the investment objectives of those funds. At March 31, 2022, funds managed by Mackenzie owned 33.3% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day. As a result of these investments, the Fund may be subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions.

During the period, the Fund received \$0.1 million in income distributions from investments in exchange-traded funds ("ETFs") managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.

## Past Performance

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

## Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

## Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2022. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return: <sup>1</sup>	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception <sup>2</sup>
Series A	6.3	n/a	n/a	n/a	7.1
Series F	7.7	n/a	n/a	n/a	8.5

Series O	8.6	n/a	n/a	n/a	9.5
Series PW	6.5	n/a	n/a	n/a	7.4
Series PWFB	8.1	n/a	n/a	n/a	8.8
Series PWX	8.6	n/a	n/a	n/a	9.4
Series R	8.6	n/a	n/a	n/a	9.4
Blended Index	2.3	n/a	n/a	n/a	Note 3
ICE BofA Global Broad Market (Hedged) Index*	-4.1	n/a	n/a	n/a	Note 4
MSCI World High Dividend Yield (Net) Index	8.8	n/a	n/a	n/a	Note 5
ICE BofA Global High Yield (Hedged) Index	-3.4	n/a	n/a	n/a	Note 6
MSCI World Infrastructure (Net) Index	5.6	n/a	n/a	n/a	Note 7
FTSE EPRA Nareit Developed REITs Index	18.5	n/a	n/a	n/a	Note 8

\* Broad-based index

The blended index is composed of 40% ICE BofA Global Broad Market (Hedged) Index, 25% MSCI World High Dividend Yield (Net) Index, 15% ICE BofA Global High Yield (Hedged) Index, 10% MSCI World Infrastructure (Net) Index and 10% FTSE EPRA Nareit Developed REITs Index.

The ICE BofA Global Broad Market (Hedged) Index tracks the performance of investment grade debt publicly issued in major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged to the Canadian dollar.

The MSCI World High Dividend Yield (Net) Index includes large- and mid-cap stocks across 23 developed market country indices. The index selects equities from the MSCI World Index (excluding real estate investment trusts) with higher-than average dividend yields that are both sustainable and persistent. The index also applies quality screens and reviews 12-month past performance to omit stocks with potentially deteriorating fundamentals that could force them to eliminate or reduce dividends. Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

The ICE BofA Global High Yield (Hedged) Index tracks the performance of non-investment grade corporate debt publicly issued in the major domestic or eurobond markets and denominated in U.S. dollars, Canadian dollars, British pounds or euros. The foreign currency exposure is hedged to the Canadian dollar.

The MSCI World Infrastructure (Net) Index represents large- and mid-cap equity performance across 23 developed markets. All securities in the index are classified in the energy, industrials and utilities sectors as per the Global Industry Classification Standard ("GICS"). Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

The FTSE EPRA Nareit Developed REITs Index is designed to track the performance of listed real estate investment trusts ("REITs") worldwide. Relevant real estate activities are defined as the ownership, trading and development of income-producing real estate.

- (1) The percentage return differs for each series because the management fee rate and expenses differ for each series.
- (2) The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.
- (3) The return of the blended index since inception for each series is 5.0%.
- (4) The return of the ICE BofA Global Broad Market (Hedged) Index since inception for each series is -2.9%.
- (5) The return of the MSCI World High Dividend Yield (Net) Index since inception for each series is 12.4%.
- (6) The return of the ICE BofA Global High Yield (Hedged) Index since inception for each series is 4.1%.
- (7) The return of the MSCI World Infrastructure (Net) Index since inception for each series is 6.9%.
- (8) The return of the FTSE EPRA Nareit Developed REITs Index since inception for each series is 18.4%.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

Net asset value per security (\$)	10.44	10.38

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or ETFs), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including exchange-traded funds or ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

---

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with the Manager may be entitled to distribution-related payments from the Manager on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

The Manager used approximately 44% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 1% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

## Fund Formation and Series Information

The Fund may have undergone a number of changes, such as a reorganization or a change in manager, mandate or name. A history of the major changes affecting the Fund in the last 10 years can be found in the Fund's Annual Information Form.

Date of Formation: April 17, 2020

The Fund may issue an unlimited number of securities of each series. The number of issued and outstanding securities of each series is disclosed in *Financial Highlights*.

**Series Offered by Mackenzie Financial Corporation** (180 Queen Street West, Toronto, Ontario, M5V 3K1; 1-800-387-0614; [www.mackenzieinvestments.com](http://www.mackenzieinvestments.com))

Series A are offered to retail investors investing a minimum of \$500.

Series F securities are offered to retail investors who are enrolled in a dealer-sponsored fee-for-service or wrap program, who are subject to an asset-based fee rather than commissions on each transaction and who invest at least \$500; they are also available to employees of Mackenzie and its subsidiaries, and directors of Mackenzie.

Series FB securities are offered to retail investors investing a minimum of \$500. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor.

Series O securities are offered only to investors investing a minimum of \$500,000 who have an account with Mackenzie Private Wealth Counsel; certain institutional investors; investors in a qualified group plan, and certain qualifying employees of Mackenzie and its subsidiaries.

Series PW securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000.

Series PWFB securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor.

Series PWX securities are offered through our Private Wealth Solutions to certain high net worth investors who invest a minimum of \$100,000. Investors are required to negotiate their advisor service fee, which cannot exceed 1.50%, with their financial advisor.

Series R securities are offered only to other funds managed by Mackenzie on a non-prospectus basis in connection with fund-of-fund arrangements.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. All deferred sales charge purchase options will cease on or prior to June 2022. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.

Series	Inception/ Reinstatement Date	Management Fees	Administration Fees
Series A	June 11, 2020	1.85%	0.24%
