

MACKENZIE CANADIAN AGGREGATE BOND INDEX ETF

Annual Management Report of Fund Performance

For the Year Ended March 31, 2022

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the exchange-traded fund ("ETF"). You may obtain a copy of the annual financial statements, at no cost, by calling the toll-free number 1-800-387-0614, by writing to us at Mackenzie Financial Corporation, 180 Queen Street West, Toronto, Ontario M5V 3K1, by visiting our website at www.mackenzieinvestments.com or by visiting the SEDAR website at www.sedar.com. Unitholders may also contact us using one of these methods to request a copy of the ETF's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the ETF's Prospectus and ETF Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the ETF's current net asset value per unit and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

Management Discussion of Fund Performance

June 3, 2022

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the ETF's performance and outlook in the year ended March 31, 2022 (the "period"). If the ETF was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the ETF. In addition, net asset value ("NAV") refers to the value of the ETF as calculated for subscription and redemption purposes, on which the discussion of ETF performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Investment Objective and Strategies

The ETF seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Canadian Float Adjusted Universe Bond Index, or any successor thereto. It invests primarily in Canadian investment grade bonds.

Risk

The risks of the ETF remain as discussed in the ETF's Prospectus.

The ETF is suitable for short- to medium-term investors looking for a Canadian fixed income fund to hold as part of their portfolio, who can handle the volatility of bond markets and who have a low tolerance for risk.

Results of Operations

Investment Performance

During the period, the ETF returned -4.6% (after deducting fees and expenses). This compares with the Solactive Canadian Float Adjusted Universe Bond Index return of -4.6% and the Solactive Canadian Select Universe Bond Index return of -4.7%. Effective April 30, 2021, the Solactive Canadian Float Adjusted Universe Bond Index (the "new index") replaced the Solactive Canadian Select Universe Bond Index (the "previous index") to enable the ETF to invest in a greater number of securities (see *Recent Developments*). All index returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Emerging COVID-19 variants, rising inflation driven by supply-chain and labour disruptions, changing monetary policy and escalating geopolitical tensions created volatility over the period. In mid-2021, the Bank of Canada committed to reducing its economic support by decreasing asset purchases. In an effort to combat the highest inflation in decades, it raised its policy rate to 0.50% in March 2022, the first in an expected series of increases. As a result, short-term yields increased sharply amid concerns about economic growth.

For the first month of the period, the ETF invested substantially all its assets in the bonds that make up the previous index, holding each bond in approximately the same proportion as its weighting in the index. After April 30, the ETF used a sampling methodology to invest in broadly diversified securities that collectively approximate the full new index in terms of key characteristics.

Because each index was tracked for a partial period, the ETF has a blended return, whereas each index return represents the full period.

The ETF performed in line with the new index. The difference in performance between the ETF and the previous index reflects the transition from tracking the previous index to tracking the new index. This was partially offset by management fees and other operating expenses.

Over the period, changes were made to the ETF's holdings to reflect the composition of the new index.

Net Assets

The ETF's net assets increased by 29.8% during the period to \$169.1 million. This change was composed primarily of \$8.4 million in net losses (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$47.3 million due to net unitholder activity (including sales, redemptions and cash distributions).

Recent Developments

Ongoing uncertainty regarding the duration and long-term impact of the COVID-19 pandemic and the effectiveness of vaccines against new variants of the virus contributes to uncertainty regarding the timing of a full economic recovery. As a result, it is not possible to reliably estimate the impact of the pandemic on the financial results and condition of the ETF in future periods.

Because the ETF is an index fund, neither market expectations nor recent developments affect the composition of the portfolio.

On April 30, 2021, the index that the ETF seeks to replicate changed from the Solactive Canadian Select Universe Bond Index to the Solactive Canadian Float Adjusted Universe Bond Index, which includes a greater number of securities. Both indices are designed to provide a broad measure of the Canadian investment grade fixed income market, covering government, quasi-government and corporate bonds.

Effective September 22, 2021, Atul Tiwari was appointed to the Mackenzie Funds' Independent Review Committee.

Related Party Transactions

Management Fees

The management expense ratio ("MER") for the ETF during the year ended March 31, 2022, was similar to the MER for the year ended March 31, 2021. Total expenses paid vary from period to period mainly as a result of changes in average assets in the ETF. The MERs are presented in the *Financial Highlights* section of this report. The ETF paid management fees to the Manager at the annual rate of 0.07%.

The management fee for the ETF is calculated and accrued daily as a percentage of its NAV. The ETF's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the ETF, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, providing other services and licensing the index, and to pay for all costs and expenses (other than certain specified fund costs as more fully described in the Prospectus) required to operate the ETF.

MACKENZIE CANADIAN AGGREGATE BOND INDEX ETF

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

Other Related Party Transactions

The Manager is wholly owned by IGM Financial Inc., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Corp. of Canada are therefore considered affiliates of the Manager. At March 31, 2022, the ETF held the following investment(s) in companies affiliated with the Manager: \$0.2 million invested in securities issued by Great-West Lifeco Inc., \$0.2 million invested in securities issued by IGM Financial Inc. and \$0.1 million invested in securities issued by Power Corp. of Canada. The investment(s) represented 0.2% of the ETF's NAV. In making the investment(s), the Manager relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with the Manager's policies. The Manager's policies are designed to ensure that any related party transaction (i) is made free from any influence by an entity related to the Manager and without taking into account any considerations relevant to an entity related to the Manager; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the ETF; and (iii) achieves a fair and reasonable result for the ETF.

Investment funds managed by Mackenzie and its affiliates may invest in the ETF in accordance with the investment objectives of those funds. At March 31, 2022, funds managed by Mackenzie owned 7.0% of the ETF's NAV, funds managed by Canada Life Investment Management Ltd. owned 54.4% of the ETF's NAV, funds managed by I.G. Investment Management, Ltd. owned 27.9% of the ETF's NAV, and funds managed by Counsel Portfolio Services Inc. owned 4.8% of the ETF's NAV. All related party transactions are based on the current market price. As a result of these investments, the ETF may be subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effects on the ETF or on its investors, through such processes as settling transactions in kind, charging creation and/or redemption fees for transactions settling in cash, and establishing appropriate order cut-off time for transactions.

Past Performance

The ETF's past performance information is presented in the following chart and table. It assumes all distributions made by the ETF in the periods presented are reinvested in additional units of the ETF. The chart and table do not take into account brokerage commissions or income taxes payable by any investor that would have reduced returns. The past performance of the ETF is not necessarily an indication of how it will perform in the future.

If you hold this ETF outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units of the ETF. The amount of reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gain or increase your capital loss when you later sell from the ETF, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar chart presents the performance of the ETF for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the ETF's inception date (January 29, 2018), as applicable, would have increased or decreased by the last day of the fiscal period presented.

Annual Compound Returns

The following table compares the historical annual compound total returns for the ETF with the relevant index or indices shown below for each of the periods ended March 31, 2022. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return:	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception
Mackenzie Canadian Aggregate Bond Index ETF	-4.6	0.4	n/a	n/a	1.7
Solactive Canadian Float Adjusted Universe Bond Index*	-4.6	0.5	n/a	n/a	1.7
Solactive Canadian Select Universe Bond Index**	-4.7	0.4	n/a	n/a	1.7

* New index

** Previous index

The Solactive Canadian Float Adjusted Universe Bond Index is designed to track the performance of the bonds denominated in Canadian dollars that are issued in the Canadian market. The index seeks to provide a broad measure of the Canadian investment grade fixed income market, covering government, quasi-government and corporate bonds. In future reports, performance will be compared to this index.

The Solactive Canadian Select Universe Bond Index is designed to track the performance of the Canadian investment grade fixed income market, covering government, quasi-government and corporate bonds denominated in Canadian dollars and issued in Canada. In future reports, performance will no longer be compared to this index.

Total increase (decrease) from operations²	(5.67)	0.02	4.50	5.92	1.21
Distributions:					
From net investment income (excluding Canadian dividends)	(2.68)	(2.59)	(2.68)	(2.75)	-
From Canadian dividends	-	-	-	-	(0.45)
From capital gains	-	(3.21)	(0.87)	-	-
Return of capital	-	-	-	(0.03)	-
Total annual distributions³	(2.68)	(5.80)	(3.55)	(2.78)	(0.45)
Net assets, end of period	96.07	103.35	104.53	102.48	100.33

- These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per unit. This information is derived from the ETF's audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value per unit calculated for ETF pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.
- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the fiscal period.
- Distributions were paid in cash/reinvested in additional units of the ETF, or both.

Index Provider Disclaimer

The Mackenzie Canadian Aggregate Bond Index ETF is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using Solactive Canadian Float Adjusted Universe Bond Index (the "Underlying Index"), including its trademark and/or prices, at any time or in any other respect. The Underlying Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Underlying Index is calculated correctly. Irrespective of its obligations toward Mackenzie, Solactive AG has no obligation to point out errors in the Underlying Index to third parties including but not limited to investors and/or financial intermediaries of the Mackenzie Canadian Aggregate Bond Index ETF. Neither publication of the Underlying Index by Solactive AG nor the licensing of the Underlying Index or Underlying Index trademark for the purpose of use in connection with the Mackenzie Canadian Aggregate Bond Index ETF constitutes a recommendation by Solactive AG to invest capital in Mackenzie Canadian Aggregate Bond Index ETF nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in Mackenzie Canadian Aggregate Bond Index ETF.

Portfolio turnover rate (%)⁴	37.49	65.19	73.35	80.80	n/a
Net asset value per unit (\$)	96.07	103.35	104.54	102.46	100.32
Closing market price (\$)⁵	96.07	103.33	103.90	102.45	100.34

- This information is provided as at the end of the fiscal period shown.
- Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. If the ETF was established in the period, the MER is annualized from the date of inception to the end of the period. Where the ETF directly invests in securities of another fund (including other ETFs), the MER presented for the ETF includes the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period. Where the ETF invests in securities of another fund (including other ETFs), the TER presented for the ETF includes the portion of TERs of the other fund(s) attributable to this investment. Mackenzie may reimburse the ETF for certain brokerage commissions and other transaction costs (including those payable to the custodian or its agents). Mackenzie may make these reimbursements at its discretion and stop these reimbursements at any time without notice.
- The ETF's portfolio turnover rate indicates how actively the ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher the ETF's portfolio turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF. The portfolio turnover rate is not provided when the ETF is less than one year old.
- Closing market price, or the midpoint of the bid and ask prices in the absence of a closing market price, on the last trading day of the period as reported on the Toronto Stock Exchange.
