

Annual Management Report of Fund Performance

For the Year Ended March 31, 2022

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the exchange-traded fund ("ETF"). You may obtain a copy of the annual financial statements, at no cost, by calling the toll-free number 1-800-387-0614, by writing to us at Mackenzie Financial Corporation, 180 Queen Street West, Toronto, Ontario M5V 3K1, by visiting our website at www.mackenzieinvestments.com or by visiting the SEDAR website at www.sedar.com. Unitholders may also contact us using one of these methods to request a copy of the ETF's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the ETF's Prospectus and ETF Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the ETF's current net asset value per unit and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

Management Discussion of Fund Performance

June 3, 2022

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the ETF's performance and outlook in the year ended March 31, 2022 (the "period"). If the ETF was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the ETF. In addition, net asset value ("NAV") refers to the value of the ETF as calculated for subscription and redemption purposes, on which the discussion of ETF performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Investment Objective and Strategies

The ETF seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Wealthsimple DM ex NA Socially Responsible Factor Index, or any successor thereto. It invests primarily in equity securities of companies in Europe, Australasia and the Far East with the goal of achieving diversified exposure to companies that do not violate commonly held social and environmental values.

Risk

The risks of the ETF remain as discussed in the ETF's Prospectus.

The ETF is suitable for medium- to long-term investors looking for a socially responsible international equity fund to hold as part of their portfolio, who can handle the volatility of stock markets and who have a medium tolerance for risk.

Results of Operations

Investment Performance

During the period, the ETF returned -6.7% (after deducting fees and expenses). This compares with the Solactive Wealthsimple DM ex NA Socially Responsible Factor Index return of -6.6%. All index returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

The Russian invasion of Ukraine dampened European economic prospects and pushed energy prices up amid supply concerns. Bond yields rose, generating expectations that the European Central Bank would raise interest rates more quickly than previously forecast to tame surging rates of inflation. In Japan, stocks declined and the yen fell to its lowest level in seven years. In China, pandemic-related lockdowns, an energy shortage, regulatory uncertainty and a slowing housing market caused lower-than-expected economic growth and steep declines in equities.

Through the period, the ETF invested substantially all its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. Alternatively, the ETF may use a sampling methodology to invest in broadly diversified securities that collectively approximate the full index in terms of key characteristics.

The difference in performance between the ETF and the index resulted primarily from management fees and other operating expenses.

Over the period, changes were made to the ETF's holdings to reflect changes in the composition of the index.

Environmental, Social and Governance ("ESG") Impact

The index seeks to avoid investing in companies which violate common social and environmental values; companies with involvement in fossil fuels, weapons manufacturing, or other controversies; and companies with insufficient gender representation at the board level. Revenue thresholds of 5% are used to determine involvement in controversial industries. The index excludes companies involved in oil, gas and thermal coal production, casinos and gaming, adult entertainment, tobacco, and alcohol, defense contractors and weapon manufacturers. A company in the index must have at least three women on its board or at least 25% of the board must be female. The index uses a multi-factor screen and risk weighting to improve diversification.

The index is rebalanced quarterly. Over the period, 71 securities were added to the ETF and 41 were eliminated. The addition and removal of securities may have resulted from non-ESG-related screens, as stated above. All the holdings earned 5% or less of their revenue from controversial industries. Based on 2020 scope 1 and 2 greenhouse gas emissions data from S&P Global Trucost, the weighted average carbon intensity of the portfolio was 32 tonnes of carbon dioxide equivalent emissions per million U.S. dollars of revenue ("tCO2e/US\$M") at March 31, 2021, and 34 tCO2e/US\$M at March 31, 2022. The percentage of the portfolio invested in companies where women represent at least 25% of the board was 86% at March 31, 2021, and 91% at March 31, 2022, based on the most recent fiscal year-end company filings.

Net Assets

The ETF's net assets increased by 41.6% during the period to \$473.9 million. This change was composed primarily of \$39.1 million in net losses (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$178.4 million due to net unitholder activity (including sales, redemptions and cash distributions).

Recent Developments

Ongoing uncertainty regarding the duration and long-term impact of the COVID-19 pandemic and the effectiveness of vaccines against new variants of the virus contributes to uncertainty regarding the timing of a full economic recovery. As a result, it is not possible to reliably estimate the impact of the pandemic on the financial results and condition of the ETF in future periods.

Because the ETF is an index fund, neither market expectations nor recent developments affect the composition of the portfolio.

Effective September 22, 2021, Atul Tiwari was appointed to the Mackenzie Funds' Independent Review Committee.

Related Party Transactions

Management Fees

The management expense ratio ("MER") for the ETF during the year ended March 31, 2022, was similar to the MER for the year ended March 31, 2021. Total expenses paid vary from period to period mainly as a result of changes in average assets in the ETF. The MERs are presented in the *Financial Highlights* section of this report. The ETF paid management fees to the Manager at the annual rate of 0.25%.

The management fee for the ETF is calculated and accrued daily as a percentage of its NAV. The ETF's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the ETF, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, providing other services and licensing the index, and to pay for all costs and expenses (other than certain specified fund costs as more fully described in the Prospectus) required to operate the ETF.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

Other Related Party Transactions

The ETF did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions in the period.

Past Performance

The ETF's past performance information is presented in the following chart and table. It assumes all distributions made by the ETF in the periods presented are reinvested in additional units of the ETF. The chart and table do not take into account brokerage commissions or income taxes payable by any investor that would have reduced returns. The past performance of the ETF is not necessarily an indication of how it will perform in the future.

If you hold this ETF outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units of the ETF. The amount of reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gain or increase your capital loss when you later sell from the ETF, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The following bar chart presents the performance of the ETF for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the ETF's inception date (June 16, 2020), as applicable, would have increased or decreased by the last day of the fiscal period presented.

Annual Compound Returns

The following table compares the historical annual compound total returns for the ETF with the relevant index or indices shown below for each of the periods ended March 31, 2022. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return:	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception
Wealthsimple Developed Markets ex NA Socially Responsible Index ETF	-6.7	n/a	n/a	n/a	6.6
Solactive Wealthsimple DM ex NA Socially Responsible Factor Index	-6.6	n/a	n/a	n/a	6.8

The Solactive Wealthsimple DM ex NA Socially Responsible Factor Index seeks to achieve diversified exposure to equities in 22 developed markets, excluding Canada and the United States, without investing in companies with poor social and/or environmental values. The index excludes companies involved in human rights violations or controversial industries including fossil fuels, gambling, tobacco, weapons and alcohol. Companies with low gender diversity on their boards and those with high carbon intensity within their industry are also excluded. The index uses a multi-factor screen and risk weighting to improve diversification. The ETF tracks a version of the index calculated net of withholding taxes.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2022

Financial Highlights

The following tables show selected key financial information about the ETF and are intended to help you understand the ETF's financial performance for each of the fiscal periods presented below. In the period when the ETF was established, "period" represents the period from inception to the end of that fiscal period. The inception date can be found under *Past Performance*.

THE ETF'S NET ASSETS PER SECURITY (\$)¹

	Mar. 31 2022	Mar. 31 2021
CAD Units (Ticker: WSRD)		
Net assets, beginning of period	29.88	25.00
Increase (decrease) from operations:		
Total revenue	0.65	0.35
Total expenses	(0.12)	(0.10)
Realized gains (losses) for the period	2.21	1.36
Unrealized gains (losses) for the period	(5.54)	3.19
Total increase (decrease) from operations²	(2.80)	4.80
Distributions:		
From net investment income (excluding Canadian dividends)	(0.42)	(0.13)
From Canadian dividends	–	–
From capital gains	(2.48)	(0.55)
Return of capital	(0.04)	–
Total annual distributions³	(2.94)	(0.68)
Net assets, end of period	27.55	29.88

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per unit. This information is derived from the ETF's audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value per unit calculated for ETF pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional units of the ETF, or both.

RATIOS AND SUPPLEMENTAL DATA

	Mar. 31 2022	Mar. 31 2021
CAD Units (Ticker: WSRD)		
Total net asset value (\$000)¹	473,926	334,646
Units outstanding (000)¹	17,200	11,200
Management expense ratio (%)²	0.28	0.28
Management expense ratio before waivers or absorptions (%)²	0.28	0.28
Trading expense ratio (%)³	0.10	0.09
Trading expense ratio before reimbursements (%)³	0.10	0.09
Portfolio turnover rate (%)⁴	74.91	n/a
Net asset value per unit (\$)	27.55	29.88
Closing market price (\$)⁵	27.32	30.04

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. If the ETF was established in the period, the MER is annualized from the date of inception to the end of the period. Where the ETF directly invests in securities of another fund (including other ETFs), the MER presented for the ETF includes the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period. Where the ETF invests in securities of another fund (including other ETFs), the TER presented for the ETF includes the portion of TERs of the other fund(s) attributable to this investment. Mackenzie may reimburse the ETF for certain brokerage commissions and other transaction costs (including those payable to the custodian or its agents). Mackenzie may make these reimbursements at its discretion and stop these reimbursements at any time without notice.

(4) The ETF's portfolio turnover rate indicates how actively the ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher the ETF's portfolio turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF. The portfolio turnover rate is not provided when the ETF is less than one year old.

(5) Closing market price, or the midpoint of the bid and ask prices in the absence of a closing market price, on the last trading day of the period as reported on the Toronto Stock Exchange.
