## Management Discussion of Fund Performance

November 12, 2019

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended September 30, 2019, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

### Results of Operations

#### Investment Performance

The performance of the Fund's Series A and Series LB securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series A and Series LB securities returned 3.4% (after deducting fees and expenses paid by the series). This compares with a return of 3.9% for a blended index composed of a 90% weighting in the Fund's broad-based index, the FTSE Canada Universe Bond Index (returned 3.7%), and a 10% weighting in the ICE BofAML Global Broad Market (Hedged) Index (returned 5.2%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Developed global sovereign bond markets rallied strongly over the period, with longer-term bonds providing the biggest gains. Yield curves flattened, and even inverted, as many developed market central banks lowered interest rates or discussed ways to support their economies. The U.S. bond market significantly outperformed Canada's as the U.S. Federal Reserve lowered the federal funds rate twice, while the Bank of Canada kept its policy rate unchanged at 1.75%. In emerging markets, bond performances varied greatly, and currencies generally depreciated relative to the Canadian dollar. High-yield bond markets performed well.

The following discussion reflects the Fund's allocation decisions and the activities and performance of its underlying investment funds and other directly held securities. The Fund underperformed both the broad-based index and the blended index, with security selection in government bonds detracting from performance. The Fund's longer duration contributed to performance relative to both indices as yields fell. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund's foreign currency exposure was substantially hedged. Hedging had no significant impact on performance relative to the index, which is fully hedged.

The Fund used long and short futures to manage its exposures to specific asset classes and markets, and these holdings contributed to performance overall.

Over the period, portfolio activity and market effect resulted in increased exposure to fixed income and decreased exposure to equities. Exposure to the United States increased, while exposure to Canada decreased. At the sector level, exposure to foreign government bonds and provincial bonds increased, while exposure to federal bonds decreased.

Changes to the portfolio included a new allocation to Mackenzie Emerging Markets Bond Index ETF (CAD-Hedged).

#### Net Assets

The Fund's NAV increased by 19.5% to \$242.0 million at September 30, 2019, from \$202.6 million at March 31, 2019. This change was composed primarily of \$7.9 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, and \$31.5 million in net sales.

#### Fees and Expenses

The annualized management expense ratio ("MER") for Series A of 1.27% during the period ended September 30, 2019, was unchanged from the MER for the year ended March 31, 2019. The annualized MER for Series LB of 1.32% during the period ended September 30, 2019, was slightly lower than the MER of 1.33% for the year ended March 31, 2019. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report.

## Recent Developments

On July 19, 2019, Nelson Arruda of the Mackenzie Multi-Asset Strategies team assumed responsibility from Alain Bergeron as lead portfolio manager of the Fund.

For much of the period, markets focused on the U.S.–China trade war and the negative impacts on global growth. In the United States, growth has slowed largely due to weaker trade and manufacturing. However, the Multi-Asset Strategies team believes domestically focused sectors such as personal consumption and housing may help the U.S. economy avoid recession. In Canada, the economy has had strong jobs and wage growth.

Internationally, many economies that are more heavily dependent on global trade, such as Germany, have suffered from the trade disruptions. Major central banks around the globe, including the Federal Reserve and the European Central Bank, have initiated or are maintaining ultra-easy monetary policy, with lower to negative interest rates and large-scale asset purchases. The team believes such measures may remain in place until growth significantly re-accelerates. In the team's view, the Bank of Canada will have a less accommodative policy than that of its global counterparts.

## Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

## Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

## Other Related Party Transactions

At September 30, 2019, Mackenzie had an investment of \$16,597 in the Fund (less than 0.1% of the Fund's NAV).

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

## Past Performance

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

On September 28, 2012, the Fund changed its mandate to invest primarily in other mutual funds to gain exposure to Canadian and foreign fixed income securities and other asset classes, rather than investing mainly in fixed income securities directly. The past performance before this date was achieved under the previous objectives.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, LBC was entitled to approximately 23% of the total management fees that Mackenzie received from the LBC series of all Mackenzie funds during the period. Mackenzie is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 38% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option, various low-load purchase options and a no-load purchase option. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
