## Interim Management Report of Fund Performance

For the Six-Month Period Ended September 30, 2023

This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You may obtain a copy of the interim financial report or annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR + website at www.sedarplus.ca.
Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.
For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

## A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forwardlooking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.
The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

## Management Discussion of Fund Performance

## November 13, 2023

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2023 (the "period"). If the Fund was established during the period, "period" represents the period since inception.
In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.
Please read A Note on Forward-Looking Statements on the first page of this document.

## Results of Operations

## Investment Performance

The performance of all series in the current and previous periods is shown in the Past Performance section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the Fund Formation and Series Information section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.
During the period, the Fund's Series A securities returned $-2.2 \%$ (after deducting fees and expenses paid by the series). This compares with a return of $0.5 \%$ for a blended index composed of a $52.5 \%$ weighting in the Fund's broad-based index, the MSCI World (Net) Index (returned 3.5\%), and a $47.5 \%$ weighting in the ICE BofA Global Broad Market (Hedged) Index (returned -2.9\%). Since inception on June 16, 2023, the Fund's Series LB securities returned $-2.3 \%$, which compares with the blended index return of $-1.4 \%$ for the same period. The MSCI World (Net) Index returned $-0.5 \%$ and the ICE BofA Global Broad Market (Hedged) Index returned $-2.3 \%$ since the inception of Series LB. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.
Global equities rose over the period as central banks slowed the pace of their interest rate increases. The global economy proved resilient, and employment remained strong. With high inflation persisting, the U.S. Federal Reserve, European Central Bank and Bank of England raised their policy rates, albeit at a slower pace. In response, global fixed income yields moved higher, while bond prices fell. Global corporate bond prices declined but outperformed government bonds, with credit spreads (the difference in yield between corporate and government bonds) narrowing.
Within the MSCI World (Net) Index, Norway, Italy and the United States were the strongest-performing markets in Canadian dollar terms, while Hong Kong, New Zealand and Finland were the weakest. The communication services, energy and information technology sectors were the strongest performers, while utilities, consumer staples and real estate were the weakest.
The Fund underperformed the broad-based index because of the Fund's allocation to global fixed income, which underperformed global equities in the period. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.
The Fund underperformed the blended index, with the Fund's equity portfolio underperforming the equity portion of the blended index.

Within the equity portion of the Fund, stock selection in the United States and Japan detracted from performance. In sector terms, stock selection in information technology detracted from performance, as did an overweight position and stock selection in consumer staples. Conversely, underweight exposure to utilities contributed to performance.
Within the fixed income portion of the Fund, holdings in term loans contributed to performance. Conversely, holdings in corporate bonds detracted from performance, particularly in the financial sector.
Over the period, the Fund's exposure to foreign government bonds increased, based on the portfolio management team's assessment of valuations and opportunities, and as a result of market movements.

## Net Assets

The Fund's net assets decreased by $1.2 \%$ during the period to $\$ 2.0$ billion. This change was composed primarily of $\$ 37.7$ million in net losses (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of $\$ 12.8$ million due to net securityholder activity (including sales, redemptions and cash distributions). The securityholder activity includes an inflow of $\$ 82.1$ million relating to fund merger activity (see Recent Developments).

## Fees and Expenses

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2023, was generally similar to the MER for the year ended March 31, 2023. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the Financial Highlights section of this report.

## Recent Developments

The global equity portfolio management team believes that in periods of elevated volatility, it is most important to focus on what can be controlled. In response to higher levels of inflation and market volatility, the team continued to identify holdings for the portfolio in a diversified collection of companies that have the ability to raise prices without reducing demand for their products and/or that have business models with a competitive advantage.
At the end of the period, inflation in the United States was easing but remained high. The fixed income portfolio management team expects interest rates to remain at elevated levels for longer than initially expected, while economic growth slows because of the impact of earlier central bank rate increases. In emerging markets, the team believes the combination of high yields, inflation that appears to be under control and the likelihood of central bank rate cuts has created an attractive investment backdrop.
With the approval of the Mackenzie Funds' Independent Review Committee, Mackenzie Private Global Income Balanced Pool merged into the Fund on June 16, 2023. The Manager does not consider this merger to be a material change for the Fund's investors.

## Related Party Transactions

## Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under Fund Formation and Series Information in this report and as more fully described in the Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also Management Fees.

## Other Related Party Transactions

At September 30, 2023, the Fund held an investment of $\$ 8.9$ million ( $0.5 \%$ of the Fund's NAV) in Northleaf Private Credit II LP, a private fund managed by Northleaf Capital Partners, a company affiliated with the Manager. This represents US $\$ 6.5$ million as part of a total commitment to invest US $\$ 8.1$ million. In making the investment, the Manager relied on a positive recommendation previously issued by the Mackenzie Funds' Independent Review Committee.
At September 30, 2023, the Fund held an investment of $\$ 4.0$ million ( $0.2 \%$ of the Fund's NAV) in Sagard Credit Partners II, LP, a private fund managed by Sagard Holdings Inc., a company affiliated with the Manager. This represents US $\$ 2.8$ million as part of a total commitment to invest US $\$ 8.1$ million. In making the investment, the Manager relied on a positive recommendation previously issued by the Mackenzie Funds' Independent Review Committee.
The Manager is wholly owned by IGM Financial Inc., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Corp. of Canada are therefore considered affiliates of the Manager. At September 30, 2023, the Fund held the following investment(s) in companies affiliated with the Manager: $\$ 4.6$ million invested in securities issued by Pernod Ricard SA. The investment(s) represented $0.2 \%$ of the Fund's NAV. In making the investment(s), the Manager relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with the Manager's policies. The Manager's policies are designed to ensure that any related party transaction (i) is made free from any influence by an entity related to the Manager and without taking into account any considerations relevant to an entity related to the Manager; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; and (iii) achieves a fair and reasonable result for the Fund. Investment funds managed by Mackenzie and its affiliates may invest in the Fund. All these investments are made on a prospectus-exempt basis in accordance with the investment objectives of those funds. At September 30, 2023, funds managed by Mackenzie owned less than $0.1 \%$ of the Fund's NAV, and funds managed by The Canada Life Assurance Company and Canada Life Investment Management Ltd. owned less than $0.1 \%$ of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day. As a result of these investments, the Fund may be subject to large transaction risk as discussed in the Fund's Simplified Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions.
At September 30, 2023, Mackenzie had an investment of $\$ 1.2$ million in the Fund ( $0.1 \%$ of the Fund's NAV).
During the period, the Fund received $\$ 0.1$ million in income distributions from investments in exchange-traded funds ("ETFs") managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.
The Manager relied on an approval issued by the Mackenzie Funds' Independent Review Committee to proceed with the merger of Mackenzie Private Global Income Balanced Pool into the Fund on June 16, 2023.

## Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.
If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.
On April 30, 2014, the Fund changed its mandate from investing in other mutual funds to investing directly in fixed income securities and income-oriented equities. The past performance before this date was achieved under the previous objective.

## Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under Fund Formation and Series Information.

(1) This information is provided as at the end of the fiscal period shown.
(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.
LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under Fund Formation and Series Information) and receives a portion of the management fees that the Fund pays to the Manager. Under this arrangement, LBC was entitled to approximately $25 \%$ of the total management fees that the Manager received from the LBC series of all Mackenzie funds during the period. The Manager is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.
The following dealers affiliated with the Manager may be entitled to distributionrelated payments from the Manager on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.
The Manager used approximately $42 \%$ of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distributionrelated payments for the Fund represented on average $41 \%$ of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.
