A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

Management Discussion of Fund Performance

November 12, 2019

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended September 30, 2019, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Results of Operations

Investment Performance

The performance of the Fund's Series SC securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the period, the Fund's Series SC securities returned 0.8% (after deducting fees and expenses paid by the series). This compares with the ICE BofAML Global Broad Market (Hedged) Index return of 5.2%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Developed global sovereign bond markets rallied strongly over the period, with longer-term bonds providing the biggest gains. Yield curves flattened, and even inverted, as many developed market central banks lowered interest rates or discussed ways to support their economies. The U.S. bond market significantly outperformed Canada's as the U.S. Federal Reserve lowered the federal funds rate twice. In emerging markets, bond performances varied greatly, and currencies generally depreciated relative to the Canadian dollar.

The Fund underperformed the index, with its shorter duration position detracting from performance as longer-term bonds posted the largest gains. The Fund's underweight exposure to Europe detracted, as did certain emerging market exposures.

Overweight exposure to Australia contributed to performance, as did holdings in Mexico and Russia.

The Fund substantially hedged its foreign currency exposure. However, the remaining unhedged exposure detracted from performance as most currencies held in the Fund depreciated relative to the Canadian dollar.

The Fund held put options on high-yield bonds and long-term government bonds to help manage credit risk exposure, which had no significant impact on performance. The Fund's futures positions, used to manage duration in specific markets, detracted from performance. Currency options, held tactically to gain exposure to currency markets, also detracted. The Fund also held swaps to gain exposure to or mitigate the risks of certain interest rate exposures, which had no significant impact on performance.

Over the period, portfolio activity and market effect resulted in new exposure to the Bahamas and Luxembourg, increased exposure to the United States, and decreased exposure to Australia and Canada. Exposure to Denmark was eliminated. At the sector level, exposure to foreign government bonds increased, while exposure to corporate bonds, federal bonds and term loans decreased. The Fund's cash position increased. The portfolio management team continually makes tactical adjustments to the Fund's allocations, so this period-end positioning does not necessarily represent a long-term strategic position.

Net Assets

The Fund's NAV declined by 2.1% to \$69.5 million at September 30, 2019, from \$71.0 million at March 31, 2019. This change was composed primarily of \$1.0 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, \$1.6 million in net redemptions, and \$1.0 million in cash distributions.

See *Other Related Party Transactions* for the percentage of the Fund's NAV owned by related parties. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors.

Fees and Expenses

The annualized management expense ratio ("MER") for Series SC of 1.52% during the period ended September 30, 2019, was slightly lower than the MER of 1.53% for the year ended March 31, 2019. The MERs (before and after waivers or absorptions, if any) for all series are presented in the *Financial Highlights* section of this report. The MERs for Series F and Series F5 decreased due to decreases in the management fee rates effective June 1, 2018, and September 28, 2018, as noted in the *Fund Formation and Series Information* section of the report. The MER for Series F also decreased due to a decrease in fund costs.

Recent Developments

At period-end, central banks in most developed countries were pursuing accommodative monetary policy and expressing tolerance for inflation rates above targeted levels. In the portfolio management team's view, the Federal Reserve would prefer to keep the federal funds rate at current levels unless U.S.–China trade negotiations do not progress smoothly. Overall, the team expects economic activity to improve as lower yields provide some stimulus. The team believes the European Central Bank and the Bank of Japan will keep monetary conditions accommodative because confidence in their economies is faltering. The team believes both regions may benefit from relief in trade tensions.

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2019

FIXED INCOME FUND

The team expects the Bank of Canada to soften its outlook for domestic growth if global growth continues to slow. The Canadian dollar, which has been strong, could weaken as other commodity-dependent currencies have. However, the team believes stable-to-higher oil prices, good consumer demand and a strong housing market provide reasons for optimism.

Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. At September 30, 2019, funds managed by Mackenzie owned 70.2% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

At September 30, 2019, Mackenzie had an investment of \$14,713 in the Fund (less than 0.1% of the Fund's NAV).

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

Past Performance

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the *Notes to Financial Statements*.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 9% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

Series F5, Series FB5, Series PWFB5, Series PWT5, Series S5 and Series T5 securities are no longer available for sale. Before January 1, 2019, Series F5, Series PWT5, Series S5 and Series T5 securities were known as Series F6, Series PWT6, Series S6 and Series T6, respectively.

Series PWF and Series PWF6 securities are no longer available for sale. Effective June 1, 2018, Series PWF and Series PWF6 securities were consolidated into Series F and Series F6 (now Series F5) securities, respectively.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option and various low-load purchase options. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
