INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Management Discussion of Fund Performance

November 13, 2025

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2025 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Investment Objective and Strategies

The Fund seeks to provide regular income and preserve capital, over a predetermined time period, by investing primarily in a portfolio of investment grade Canadian dollar- and U.S. dollar-denominated corporate bonds with an effective maturity in 2027. It is anticipated that the Fund will terminate on or about November 30, 2027. The Fund currently invests all its assets in Mackenzie Target 2027 North American IG Corporate Bond ETF (the "Underlying ETF").

Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for short-term investors looking for North American investment grade corporate bonds with a target maturity date to hold as part of their portfolio, who can handle the volatility of bond markets and who have a low tolerance for risk.

Results of Operations

Investment Performance

Investment performance is not presented because the Fund has not issued securities for the full six-month period.

Net Assets

From its inception on May 1, 2025, to September 30, 2025, the Fund experienced \$0.003 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$0.2 million due to net securityholder activity (including sales, redemptions and cash distributions).

Recent Developments

The portfolio management team views the U.S. Federal Reserve's September federal funds rate cut as an important pivot. The team recognizes that U.S. policymakers shifted to prioritizing labour market stability, even if it means allowing higher inflation in the near term. However, diverging global policy paths, shifting economic data and geopolitical uncertainty are contributing to a more complex investment environment.

Related Party Transactions

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Simplified Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

Other Related Party Transactions

At September 30, 2025, Mackenzie had an investment of \$0.2 million in the Fund (100% of the Fund's NAV). If Mackenzie decides to redeem its investment, it will do so in accordance with securities law and in a manner that reduces the possibility of adverse effects on the Fund.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions in the period.

Past Performance

Past performance is not presented because the Fund has not issued securities for the full six-month period.

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2025

Financial Highlights

Financial highlights are not presented because the Fund has not reached its first fiscal year-end.

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

IG Wealth Management Inc., a dealer affiliated with the Manager, may be entitled to distribution-related payments from the Manager on the same basis as unrelated registered brokers and dealers.

The Manager used approximately 41% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 63% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to the Fund's higher proportion of assets in series that pay a lower management fee compared to other funds managed by Mackenzie.
