

MACKENZIE GLOBAL WOMEN'S LEADERSHIP ETF

Interim Management Report of Fund Performance

For the Six-Month Period Ended September 30, 2022

This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the exchange-traded fund ("ETF"). You may obtain a copy of the interim financial report or annual financial statements, at no cost, by calling the toll-free number 1-800-387-0614, by writing to us at Mackenzie Financial Corporation, 180 Queen Street West, Toronto, Ontario M5V 3K1, by visiting our website at www.mackenzieinvestments.com or by visiting the SEDAR website at www.sedar.com.

Unitholders may also contact us using one of these methods to request a copy of the ETF's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the ETF's Prospectus and ETF Facts, which may also be obtained, at no cost, using any of the methods outlined above. For the ETF's current net asset value per unit and for more recent information on general market events, please visit our website.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

MACKENZIE GLOBAL WOMEN'S LEADERSHIP ETF

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2022

Management Discussion of Fund Performance

November 11, 2022

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the ETF's performance and outlook in the six-month period ended September 30, 2022 (the "period"). If the ETF was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the ETF. In addition, net asset value ("NAV") refers to the value of the ETF as calculated for subscription and redemption purposes, on which the discussion of ETF performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Results of Operations

Investment Performance

During the period, the ETF returned -13.4% (after deducting fees and expenses). This compares with the MSCI World (Net) Index return of -13.0%. All index returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

A stronger U.S. dollar and high inflation contributed to economic weakness across many global economies over the period. European economies also faced energy supply concerns and an increasing cost of living, while China's growth slowed in response to its ongoing "zero COVID-19" policy. The U.S. economy was relatively stronger but also showed signs of slowing. Moderating economic indicators and expectations of higher interest rates put downward pressure on equity markets.

Within the MSCI World (Net) Index, Portugal, Finland and Hong Kong were the strongest-performing markets in Canadian dollar terms, while Austria, Germany and Sweden were the weakest. The energy, consumer staples and health care sectors were the strongest performers, while communication services, information technology and materials were the weakest.

The ETF underperformed the index, with stock selection in France detracting from performance. In sector terms, underweight exposure to energy and stock selection in materials detracted from performance.

Conversely, stock selection in the United States contributed to performance. In sector terms, stock selection in health care and consumer discretionary contributed to performance.

Over the period, neither portfolio activity nor market developments significantly changed the positioning of the ETF.

Environmental, Social and Governance ("ESG") Impact

The portfolio management team employs a proprietary investment process that applies a gender leadership score based on a customized gender index of companies worldwide with the highest ratings in terms of advancing women. The index is rebalanced each year in December.

In the 2021 annual rebalancing, 67 securities were added to the index and 43 were eliminated, for a total of 434. The weighted average of women on boards of directors increased to 42% from 41%, and of women in management to 35% from 33%. Based on the index rebalancing, the team increased the number of holdings in the ETF to 434 from 410.

Net Assets

The ETF's net assets decreased by 9.7% during the period to \$25.6 million. This change was composed primarily of \$3.8 million in net losses (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$1.0 million due to net unitholder activity (including sales, redemptions and cash distributions).

Recent Developments

The weight of each holding in the ETF is based on its gender leadership score and the portfolio management team's assessment of risk. As such, the team does not generate market expectations or make investment decisions according to any macroeconomic forecast.

Related Party Transactions

Management Fees

The annualized management expense ratio ("MER") for the ETF during the period ended September 30, 2022, was similar to the MER for the year ended March 31, 2022. Total expenses paid vary from period to period mainly as a result of changes in average assets in the ETF. The MERs are presented in the *Financial Highlights* section of this report. The ETF paid management fees to the Manager at the annual rate of 0.55%.

The management fee for the ETF is calculated and accrued daily as a percentage of its NAV. The ETF's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the ETF, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio and providing other services, and to pay for all costs and expenses (other than certain specified fund costs as more fully described in the Prospectus) required to operate the ETF.

Other Related Party Transactions

The Manager is wholly owned by IGM Financial Inc., which in turn is a subsidiary of Power Corp. of Canada. Companies related to Power Corp. of Canada are therefore considered affiliates of the Manager. At September 30, 2022, the ETF held the following investment(s) in companies affiliated with the Manager: \$0.04 million invested in securities issued by Pernod Ricard SA and \$0.01 million invested in securities issued by Groupe Bruxelles Lambert SA. The investment(s) represented 0.2% of the ETF's NAV. In making the investment(s), the Manager relied on the approval of the Mackenzie Funds' Independent Review Committee. The Independent Review Committee issued the approval on the basis that the investment(s) would be made in compliance with the Manager's policies. The Manager's policies are designed to ensure that any related party transaction (i) is made free from any influence by an entity related to the Manager and without taking into account any considerations relevant to an entity related to the Manager; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the ETF; and (iii) achieves a fair and reasonable result for the ETF.

Investment funds managed by Mackenzie and its affiliates may invest in the ETF in accordance with the investment objectives of those funds. At September 30, 2022, funds managed by Mackenzie owned 55.8% of the ETF's NAV. All related party transactions are based on the current market price. As a result of these investments, the ETF may be subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effects on the ETF or on its investors, through such processes as settling transactions in kind, charging creation and/or redemption fees for transactions settling in cash, and establishing appropriate order cut-off time for transactions.

During the period, the ETF received \$0.001 million in income distributions from investments in other ETFs managed by Mackenzie to offset fees paid within those ETFs. There is no assurance that these distributions will continue in the future.

Net assets, end of period	35.04	40.47	39.47	29.74	32.60	30.34

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per unit. This information is derived from the ETF's unaudited interim financial statements and audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value per unit calculated for ETF pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional units of the ETF, or both.

RATIOS AND SUPPLEMENTAL DATA

Portfolio turnover rate (%)⁴	27.88	82.11	82.85	118.43	56.80	n/a
Net asset value per security (\$)	35.04	40.47	39.47	29.74	32.60	30.34
Closing market price (\$)⁵	35.06	40.54	39.43	29.65	32.59	30.39

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. If the ETF was established in the period, the MER is annualized from the date of inception to the end of the period. Where the ETF directly invests in securities of another fund (including other ETFs), the MER presented for the ETF includes the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period. Where the ETF invests in securities of another fund (including other ETFs), the TER presented for the ETF includes the portion of TERs of the other fund(s) attributable to this investment. The Manager may reimburse the ETF for certain brokerage commissions and other transaction costs (including those payable to the custodian or its agents). The Manager may make these reimbursements at its discretion and stop these reimbursements at any time without notice.

(4) The ETF's portfolio turnover rate indicates how actively the ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher the ETF's portfolio turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF. The portfolio turnover rate is not provided when the ETF is less than one year old.

(5) Closing market price, or the midpoint of the bid and ask prices in the absence of a closing market price, on the last trading day of the period as reported on the Aequitas NEO Exchange Inc.
